good choice.

If you're reading this, you must have excellent taste in electronics – so I don't need to say too much... but here's a quick note about why I decided to create my own line of luxury on-ear and in-ear headphones by SMS Audio™:

First: Sound quality. I like my music to sound the same at home, around the city or on the road as it does in the studio.

Second: Style. Comfort and luxury are important to me from head to toe, and my accessories should accent my style, not detract from it.

Third: Toughness. I like the things I buy to last a long time, and my headphones get heavy usage. That's why SMS headphones are made tough, rugged and flexible.

I hope you enjoy them as much as I do - I have a pair with me at all times so I never have to be far away from the music I enjoy.

P.S. Tweet up and let me know what you think:

quick start guide

Listening to Music

- 1] Plug the 3.5mm jack from your in-ear headphones into your desired audio output device.
- 2] Adjust the volume on your audio device or in-ear headphones until you reach the desired volume level, keeping in mind that listening to music too loudly for extended periods can damage your hearing.
- 3] Adjust the flexible eartips for proper fit until the in-ear headphones sit comfortably inside your ears.

WARNING: DO NOT insert your in-ear headphones too deeply into your ears. Doing so may cause permanent damage to your eardrums and can interfere with sound quality.

Apple® In-Ear Controls*

- To turn up the volume, press the **PLUS (+)** button on the audio cable.
- To turn down the volume, press the **MINUS (-)** button on the audio cable.
- To pause the music while listening, press the **SMS (SMS)** button on the audio cable; press it again to resume playback.
- To answer an incoming phone call, press the **SMS (SMS)** button on the audio/mic cable once; press it again to hang up.

Music playback will automatically pause in the event of an incoming call; if you receive the call, music will remain on pause until you hang up, and then automatically resume playback when the call ends.

FAQ

What audio devices will work with my STREET by 50™ In-Ear Headphones?

Your in-ear headphones are compatible with any device that has a 3.5mm stereo jack, by simply plugging the 3.5mm audio cable directly into the audio source; examples include MP3 players, iPod®, iPhone®, iPad®, tablet PCs, CD players, some mobile devices, portable gaming devices and laptops.

Are these “noise-cancelling” in-ear headphones?

STREET by 50™ In-Ear Headphones do not have active noise cancelling technology. Our unique shape and eartip design do provide passive sound isolation with lower background noise.
