---

Message LED

The message LED is situated on the left next to the earpiece. It indicates, for example:
◆ Missed calls
◆ New messages on the answer machine
◆ Missed appointments

For an event, which is indicated using the message LED, you are given additional information on the status screen.

Connections

Charging contacts

Micro-USB socket
Connect handset to PC.

3.5 mm jack
Connect headset, stereo mode and microphone function possible.

Base

Registration/paging key
Start paging (press **briefly**)
Set base to registration mode
(Press and **hold**)

User guide

Online: As soon as your phone is connected to the WLAN and is able to establish an Internet connection, you can use the online help on the handset.
▶ Open the application menu and tap on **Help**.

To enable you to quickly find the desired information, a table of contents, an index and a search function are available. The online help provides comprehensive information about its navigation options on the first page.

Getting started

ⓘ To use Internet services on your phone, you need an operational router with WLAN functionality and an Internet connection to which you register your handset as a WLAN client.

Install the base and charging cradle

The base and charging cradle are designed for use in closed, dry rooms within a temperature range of +5°C to +45°C.
▶ Position the base on a level, non-slip surface at a central point in the building or house, or mount the base onto the wall.

ⓘ ◆ Range for telephone mode:
Pay attention to the DECT range of the base. This is up to 50 m inside buildings and up to 300 m in unobstructed outdoor areas. The range is reduced when **Maximum range** is deactivated.
▶ Menu ▶ Settings ▶ DECT.
◆ Range for data connections:
The WLAN range of the router is normally lower than the range of the base. Refer to the user guide for your router to determine this.
◆ Never expose the phone to heat sources, direct sunlight or other electrical devices.
◆ Protect your phone from moisture, dust, corrosive liquids and vapours.

Connect the base to the telephone network and the mains power supply in the order shown below:

ⓘ ◆ The power adapter must **always be connected**, as the phone will not operate without a power supply.
◆ Use only the **supplied** power adapter and phone cord. The pin connections on telephone cables may vary.

Connect the charging cradle

▶ To remove, press the release button ③ and disconnect the plug ④.
Set up the handset for use

ⓘ To be able to use the full range of phone functions, we recommend operating the handset together with a Gigaset SL930A base. You can also register the Gigaset SL930H base to another base. You can find more information about the handset functions in connection with the individual Gigaset base at: www.gigaset.com/compatibility.

The handset display and keys are protected by a film. **Please remove the protective film!**

⚠ Please **do not** use a touchscreen pen to operate the handset!
Do not use any other manufacturers' protective case / film.
They may restrict the operability of your handset.

Insert SD card (not included)

In order to store personal data, images, videos or music, you can insert a microSD card into your handset.

▶ Insert fingernail into the slit on the card slot and pull card slot forwards.

▶ Flip card slot upwards ①.
▶ Insert card ②.

▶ Flip card slot downwards ③ and push backwards until it clicks into place ④.

Insert the battery and close the battery cover

⚠ Use only the rechargeable battery recommended by Gigaset Communications GmbH, as this could otherwise result in significant health risks and personal injury. For example, the outer casing of the battery could be destroyed or the battery could explode. The phone could also malfunction or be damaged.

▶ First insert battery with the contact side pointing down ①.
▶ Then insert battery downwards into the battery compartment ②.

▶ First orientate the battery cover with the side lugs fitting into the slots on the inside of the housing.
▶ Then press the cover until it clicks into place.

If you have to **re-open the battery cover:**
▶ Insert a fingernail into the slot at the bottom of the battery cover and pull the battery cover upwards.

Charge the battery

The battery is supplied partly charged. Please charge it completely before use.
▶ Charge the handset in the charging cradle for **4 hours**.
The handset automatically switches on when you place it into the charging cradle.

4 h

ⓘ ◆ The handset may only be placed in the designated charging cradle.
◆ The battery may heat up during charging. This is not dangerous.
◆ After a time, the charge capacity of the battery will decrease for technical reasons.

Basic settings

Before you use your phone, make the following settings:
◆ Change the language.
◆ Set the country and area code
◆ Register the handset. To do this you need the system PIN for the base.
◆ Connect the phone to the WLAN. To do this, you will need the access data to your WLAN (network name and password). To use Internet services on your phone, you will need a router with WLAN functionality and an Internet connection.

If the phone has not yet been switched on: ▶ Press and **hold** the End call key.
You configure all the settings using the Settings menu.
Open the Settings menu: ▶ Open the application menu. ▶ Tap on **Settings**.

ⓘ ◆ Information on operating the touchscreen.
◆ Information on entering text.
◆ Information on the Application menu.

Change the language

▶ Menu ▶ Settings ▶ A Language & input ▶ Language.
A list of available languages is displayed.
▶ Select desired language. Where applicable, scroll through the list to the desired language.
If the language is spoken in several countries, select the entry for the country.
Your language selection is immediately activated.

Set the country and area code

The country selection is the basis for the automatic setting of time zone and country code. Your phone needs a country and area code to correctly dial telephone numbers, which may be saved in different formats on your handset, and to load country-specific applications.

⚠ If you skip this setting, it may be the case that numbers in your phonebook, although they formally look correct, cannot be dialled.

▶ Press on start screen key. ▶ Tap on ▶ Open context menu. ▶ Tap on **Settings**.
▶ **Country:** ▶ Select country from the list.
The country code is automatically set to fit the selected country. If your country is not in the list, select **Other country** (at the very bottom of the list) and enter the country code yourself.
▶ **Country (dial code):** ▶ Enter country code. ▶ Confirm by pressing **OK**.
▶ **Area (dial code):** ▶ Enter area code. ▶ Confirm by pressing **OK**.
The code consists of a prefix and the number. The country-specific prefix is placed before the area code number if the country code is not also dialled.

Register the handset

Handsets contained in the package have already been registered to the base. If however a handset has not been registered, register it now.
On the base: ▶ Press and **hold** the Registration/paging key (min. 5 secs).
On the handset within a minute:
▶ Menu ▶ Settings ▶ Handsets & base ▶ Register.
▶ Enter the system PIN if required (factory setting: **0000**). ▶ Confirm PIN by pressing **OK**.
The connection to the base is established; this may take some time. Following a successful registration the message **Handset registered** is displayed.
▶ Confirm message by pressing **OK**.

Connect the handset to WLAN

▶ Menu ▶ Settings ▶ Wi-Fi.
▶ Switch on WLAN with the sliding switch.
A list of WLANs in range of your phone is displayed.
▶ Tap on the desired WLAN. If necessary, tap on **SCAN** to update the list.
The signal strength of the selected WLAN and the security protocol used are displayed.
▶ Enter **Password** (network key).
▶ Tap on **Connect**.
If the desired network is not displayed:
▶ Tap on **ADD A NETWORK**. ▶ Enter the **Network SSID** for the desired WLAN. ▶ Select security procedure. ▶ Enter password (network key). ▶ Tap on **Connect**.
If the handset is able to establish an Internet connection, the date and time are automatically set.
Your phone is now ready for use.

Switch the handset on/off

Switch on:	▶ Press the End call key. The device switches on after a few seconds.
Or:	▶ Place the handset into the charging cradle. It switches on after about 35 seconds.
Switch off:	▶ Press and **hold** the End call key. ▶ Power off ▶ OK.

ⓘ If a screen lock has been set up: ▶ Unlock the screen.

System PIN

Cancel   OK

Wi-Fi   ON

WiFi 1 Secured with WPA2
WiFi 2 Secured with WPA/WPA2 PSK
WiFi 3 Secured with 802.1x EAP

Getting to know and operating your phone

Unlock the display
You can select different security levels for the screen lock.
▸ Menu 🔘 ▸ Settings ⚙ ▸ 🔒 Security ▸ Screen lock.
The following settings are possible: **None, Slide** (default setting), **Pattern, PIN, Password**.

For setting "Slide"
▸ Touch lock icon and drag to the right.

For setting "Pattern"
▸ Connect four dots in the set order.

For setting "PIN" or "Password"
▸ Enter **PIN** or **password**.

Operate touchscreen
The phone is mainly operated using the display. Icons, list entries, switches and selection fields shown on the display are touch-sensitive areas. By tapping on or touching these areas and swiping over the display, you can set up and launch functions, key in or select call numbers and navigate between the various screens. Use the following actions to operate the touchscreen:

Tap
▸ Tap on an icon on the menu screen, an entry in a list or an option to activate the function or to select the list entry.

Touch and hold
▸ Touch an object for longer than 2 seconds to initiate an action.
Example:
▸ Touch an app on the menu screen to copy it to the start screen.

Drag
▸ Touch an object and drag it over the display to another position.
Example:
▸ Touch an app on the start screen and drag it up onto **Remove** to delete it from the start screen.

Swipe
▸ Swipe up/down or right/left over the display to scroll through lists or from screen to screen.

While you are scrolling, a scroll bar is displayed on the right/at the bottom. It displays the size and position of the visible area.

Zoom
Some apps allow you to zoom into or out of the partial view on display, e.g. to display images or to zoom into maps.
▸ Touch the display with two fingers and pinch them together (zoom out) or drag them apart (zoom in).
Prerequisite: The app must support zooming.

Rotate display
Some apps, e.g the browser or the calendar are better to operate in landscape format. To do this you can rotate the handset.
▸ Rotate handset. After a few seconds the content of the display is shown in landscape format.
Prerequisite: The function **Auto-rotate screen** must be activated.
▸ Menu 🔘 ▸ Settings ⚙ ▸ Display ▸ Auto-rotate screen.

Start screens (example)

Google search function

Application area, configurable
Five screens, which can be individually laid out.
▸ Place functions here that you would like to have quick access to.
▸ Swipe horizontally over the display to switch between screens.
Whichever of the five screens is currently displayed can be identified from the orange bar when scrolling.

Options bar
Frequently used functions (the same on all start pages)
◆ In the middle: Menu with all apps and widgets available on your phone.
◆ You can freely select the other functions, e.g. Phone, People, Browser.

Application menu (example)

In addition to calling functions, your phone has many other applications (apps and widgets). They are arranged in alphabetical order (cannot be changed).
Apps are the applications that are available on your phone.
Widgets are components, which are specifically intended to be displayed on a start screen, e.g. a clock, a calendar extract for the current day, an important entry from the contact list or a direct dial.

Open application menu
▸ Open start screen 🏠. Tap on 🔘.
▸ Tap on **APPS** or **WIDGETS**.

> ℹ **Load other apps and widgets onto the phone**
> Your phone is based on the Android™ platform (Android is a trademark of Google Inc.). You can expand the functionality of your phone by installing other apps and widgets.

Adjust start screens
The start screens are the starting point for all functions of your phone. In addition to the Google search function and an options bar for frequently used apps, the start screens consist of five individually configurable screens.
After switching on, the middle one of the five screens is displayed.
▸ In any application situation, open the start screen last displayed using the Start screen key 🏠.
▸ Swipe right or left over the display to scroll through the start screens.
Assemble important apps and call numbers on the start pages, which you can immediately wake up from idle state with a "touch" or call, and customise the options bar according to your requirements.

Copy app to start screen
▸ Select menu 🔘 ▸ **APPS** or **WIDGETS**.
▸ Touch desired app or widget and hold. The item is copied to the start screen. You can switch to another start screen by dragging the object to the right or left edge of the screen.
▸ Drag the item to the desired position on the start screen.

Set up direct dial (speed dial) on the start screen
▸ Open **WIDGETS** tab.
▸ Touch and hold icon **Direct dial** and position on start screen. As soon as you release the icon, the contact list is opened.
▸ Scroll to the desired entry or **Find contacts**.
▸ Tap on the desired contact. If there are multiple call numbers, select the call number.
The direct dial is created on the start screen complete with the name of the contact and, if available, their picture. The associated call number is dialled when you tap on the icon.

Remove app/widget from start screen
▸ Touch icon on the start screen and drag upwards onto **Remove**.
A direct dial is deleted. The associated entry in the contact list remains unchanged. The settings for all other functions (e.g. wake time) remain unchanged.

Set background for start screen
You can use images from your image gallery or the pre-installed background images or live backgrounds as a background for the start screen.
▸ Touch background on the start screen. ▸ **Gallery**, **Wallpaper** or **Live Wallpaper**.
▸ Select desired motif. ▸ **Set wallpaper**.

Status bar and Status screen
Icons display the phone's operating state and its current settings in the status bar.

Status bar

Icon	Meaning
	Battery charge status (off the charging cradle)
	Battery is charging (current charge status)
	DECT reception strength (**No radiation** off); White: **Maximum range** on, Green: **Maximum range** off.
	DECT reception strength (**No radiation** on); White: **Maximum range** on, Green: **Maximum range** off,
	Red cross: no connection to the base (irrespective of **No radiation** setting).
	WLAN reception strength

Icon	Meaning
	Current call
	Missed calls indicated
	Answer machine activated
	New message(s) available
	New e-mail received
	Connected to computer via USB
	Ringtone deactivated
	Alarm activated
	Software update completed

Other application-specific icons may be displayed.

Status screen
The status screen provides detailed information about the status of the phone and event occurrences, e.g. incoming calls, new messages, available downloads or.other messages from apps.
The status screen can always be displayed when the status bar is visible
▸ Touch status bar and drag status screen down.

Respond to an event
▸ Tap on a list entry to open the associated app or setting.
Example: Tap on **Missed calls** opens the call list.

Delete all events
▸ Tap on ✕ to delete all entries on the status screen.

Change the settings
▸ Tap on ⚙ to open the settings menu.

Close status screen
▸ Press ◁ key or touch the circle at the bottom of the status screen and drag the screen up.

Example

8 March
- Missed calls — 18:15 — 5 missed calls
- New messages — 16:30 — 3 new messages
- Connected as a media device — Touch for other USB options

Enter text
For functions involving text entry, a keyboard is displayed. The keyboard layout depends on the language setting.

Enter text and numbers
▸ Tap on the key icons to enter letters or digits.
Tap on:
▸ ⇧ (Shift): To switch between lowercase and uppercase.
▸ **?123** / **ABC**: To switch between entering numbers and special characters or letters.
▸ Space bar: Enter a space.
With some apps you can select one of the characters displayed above the keyboard (e.g. a colon).
▸ **Next**: Jump to the next input field.
▸ Any position: position the insertion point at this point.
▸ **Done**: End data entry.

Correct incorrect entries
▸ Delete characters to the left of the cursor: Tap **briefly** on ⌫.
▸ Delete the entire content of the numeric or text field: Press and **hold** ⌫.

Enter special letters
Special letters (diacritical characters) are language-dependent variants of certain letters, e.g. umlauts.
▸ Touch and hold the base letter. Select the desired character from the pop-up list.
The availability of characters depends on the language setting and the keyboard setting.

Cut, copy and paste text
Select word:
▸ Touch word or tap on it twice. The word is highlighted.
Select an entire text field:
▸ Touch word or tap on it twice. ▸ Tap on 📋. All text in the text field is highlighted
Cut marked text: ▸ Tap on ✂.
Copy marked text: ▸ Tap on 📋.
Paste text from clipboard: ▸ Tap on 📋.

Example

My local profile
Susan Brown

Search phone and Internet
Search your phone or the Internet for any information using Google search.
▸ Open start screen 🏠. ▸ Touch the Google search field at the top of the Start screen.
Or
▸ Menu 🔘 ▸ Search 🔍.
Below the search field, the areas which are being searched or the results from previous search operations are displayed first.
▸ Enter search string. While entering text, suggestions from the Internet search and search results from your phone (apps and contacts) are displayed below the search field.
▸ Tap on a suggestion to immediately search for it or open the app.
▸ Tap on the pen icon to the right of an entry to add the string to the search field without starting a search.

Change search options
Specify the areas, which are to be searched.
▸ Touch Google search field. ▸ Press and hold the menu key ▤.
▸ Tap on **Search Settings** at the bottom edge of the display. ▸ **Searchable items**.
▸ Select desired areas (**Web, Apps, Contacts, Music**).

Clear short cuts
You can delete links to previously found screens and apps. After doing so only the areas are displayed below the search field, which are being searched.
▸ Touch Google search field. ▸ Press and hold the menu key ▤.
▸ Tap on **Search Settings** at the bottom edge of the display. ▸ **Clear short cuts**.

Switch the display on/off
If you do not press any keys and do not touch the display, after some time the display **automatically** switches to idle state, i.e. it goes dark and data entry is no longer possible. Even the regular functionality of the keys is disabled. The period of time after which the display automatically switches to idle state, can be modified.
▸ Menu 🔘 ▸ Settings ⚙ ▸ Display ▸ Sleep.
Manually switch display to idle state
▸ **Briefly** press the End call key ☎.
Switch display on
▸ Press any key. If a screen lock is activated, this is displayed.
▸ Unlock the screen.

> ℹ An incoming call automatically switches the display on. You can accept the call. After the end of the conversation, the display goes back into idle state.

Please refer to online Help 📖 on how to use the integrated answer machine of your SL930A.

To make calls use the **Phone** 📞 app.
Open via the start screen: ▸ Press on start screen key 🏠. ▸ Tap on 📞.
Open from the menu: ▸ Open application menu 🔘. ▸ Tap on **Phone** 📞.
You may need to scroll through the pages of the application menu. The apps are sorted alphabetically.

Call (example)

1234567890

1 QU	2 ABC	3 DEF
4 GHI	5 JKL	6 MNO
7 PQRS	8 TUV	9 WXYZ
*P	0+	#R

Initiate a call
📞 using the dialling page
📋 from the call list (contains outgoing, incoming and missed calls)
📇 from the contact list
🏠 internally (call handsets registered to the same base)

Initiate call using dialling page
▸ Enter the telephone number using the keypad. When you tap on a digit, it is displayed in the number field.
▸ Tap on ⌫ to delete what has been entered.
▸ Tap on 📞 to dial a phone number that has been entered.

Accepting a call
You have the following options:
▸ Touch ringtone icon and drag to the **right**.
▸ Press 📞.
▸ If **Auto answer** is switched on, remove the handset from the charging cradle.
Switch off the ring tone: ▸ Drag the telephone icon to the **left** or press on ☎.

Functions when making calls
☎ End call (or press End call key ☎).
📋 Extend the call number (when controlling hotline menus or to remotely access an answer machine).
➖ Change speaker and hands-free volume.
🔇 Mute microphone.
◀ Initiate ringback.
👥 Initiate a three-way conference call.

Switch hands-free on/off: ▸ Press the Talk key 📞.
