WARNING:

TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPARATUS TO RAIN OR MOISTURE.

CAUTION:

TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11. Only use attachments/accessories specified by the manufacturer.
12. Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
13. Unplug this apparatus during lightning storms or when unused for long periods of time.
14. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
15. Damage Requiring Service
 - A. Unplug the apparatus from the wall outlet and refer servicing to qualified service personnel under the following conditions:
 - A. When the power-supply cord or plug is damaged,
 - B. If liquid has been spilled, or objects have fallen into the apparatus,
 - C. If the apparatus has been exposed to rain or water,

PORTABLE CART WARNING

S3125A

- D. If the apparatus does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the apparatus to its normal operation.
 - E. If the apparatus has been dropped or damaged in any way, and
 - F. When the apparatus exhibits a distinct change in performance this indicates a need for service.
- 16. Object and Liquid Entry**
Never push objects of any kind into the apparatus through openings as they may touch dangerous voltage points or short-out parts that could result in a fire or electric shock.
The apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases shall be placed on the apparatus.
Don't put candles or other burning objects on top of this unit.
- 17. Batteries**
Always consider the environmental issues and follow local regulations when disposing of batteries.
- 18. If you install the apparatus in a built-in installation, such as a bookcase or rack, ensure that there is adequate ventilation.**
Leave 20 cm (8") of free space at the top and sides and 10 cm (4") at the rear. The rear edge of the shelf or board above the apparatus shall be set 10 cm (4") away from the rear panel or wall, creating a flue-like gap for warm air to escape.
The temperature protection operates if the apparatus attain an abnormal high temperature.
The apparatus cannot operate until it has cooled down.

Important Safety Instructions

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean only with dry cloth.
7. Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.

Precautions

- 1. Recording Copyright**—Unless it's for personal use only, recording copyrighted material is illegal without the permission of the copyright holder.
- 2. AC Fuse**—The AC fuse inside the unit is not user-serviceable. If you cannot turn on the unit, contact your Onkyo dealer.
- 3. Care**—Occasionally you should dust the unit all over with a soft cloth. For stubborn stains, use a soft cloth dampened with a weak solution of mild detergent and water. Dry the unit immediately afterwards with a clean cloth. Don't use abrasive cloths, thinners, alcohol, or other chemical solvents, because they may damage the finish or remove the panel lettering.

4. Power

WARNING

BEFORE PLUGGING IN THE UNIT FOR THE FIRST TIME, READ THE FOLLOWING SECTION CAREFULLY.

AC outlet voltages vary from country to country. Make sure that the voltage in your area meets the voltage requirements printed on the unit's rear panel (e.g., AC 230 V, 50 Hz or AC 120 V, 60 Hz).

The power cord plug is used to disconnect this unit from the AC power source. Make sure that the plug is readily operable (easily accessible) at all times.

For models with **[POWER]** button, or with both **[POWER]** and **[ON/STANDBY]** buttons:

Pressing the **[POWER]** button to select OFF mode does not fully disconnect from the mains. If you do not intend to use the unit for an extended period, remove the power cord from the AC outlet.

For models with **[ON/STANDBY]** button only:

Pressing the **[ON/STANDBY]** button to select Standby mode does not fully disconnect from the mains. If you do not intend to use the unit for an extended period, remove the power cord from the AC outlet.

5. Preventing Hearing Loss

Caution

Excessive sound pressure from earphones and headphones can cause hearing loss.

6. Batteries and Heat Exposure

Warning

Batteries (battery pack or batteries installed) shall not be exposed to excessive heat as sunshine, fire or the like.

7. Never Touch this Unit with Wet Hands

—Never handle this unit or its power cord while your hands are wet or damp. If water or any other liquid gets inside this unit, have it checked by your Onkyo dealer.

8. Handling Notes

- If you need to transport this unit, use the original packaging to pack it how it was when you originally bought it.
- Do not leave rubber or plastic items on this unit for a long time, because they may leave marks on the case.
- This unit's top and rear panels may get warm after prolonged use. This is normal.
- If you do not use this unit for a long time, it may not work properly the next time you turn it on, so be sure to use it occasionally.

For British models

Replacement and mounting of an AC plug on the power supply cord of this unit should be performed only by qualified service personnel.

IMPORTANT

The wires in the mains lead are coloured in accordance with the following code:

Blue: Neutral

Brown: Live

As the colours of the wires in the mains lead of this apparatus may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

The wire which is coloured blue must be connected to the terminal which is marked with the letter N or coloured black.

The wire which is coloured brown must be connected to the terminal which is marked with the letter L or coloured red.

IMPORTANT

The plug is fitted with an appropriate fuse. If the fuse needs to be replaced, the replacement fuse must approved by ASTA or BSI to BS1362 and have the same ampere rating as that indicated on the plug. Check for the ASTA mark or the BSI mark on the body of the fuse.

If the power cord's plug is not suitable for your socket outlets, cut it off and fit a suitable plug. Fit a suitable fuse in the plug.

For European Models

Declaration of Conformity	
We, ONKYO EUROPE ELECTRONICS GmbH LIEGNITZERSTRASSE 6, 82194 GROEBENZELL, GERMANY	
declare in own responsibility, that the ONKYO product described in this instruction manual is in compliance with the corresponding technical standards such as EN60065, EN55013, EN55020 and EN61000-3-2, -3-3.	
GROEBENZELL, GERMANY	 K. MIYAGI
ONKYO EUROPE ELECTRONICS GmbH	

Supplied Accessories

Make sure you have the following accessories:

Indoor FM antenna (→ [page 17](#))

AM loop antenna (→ [page 17](#))

Remote controller (RC-762M) and two batteries (AA/R6)

Quick Start Guide

* In catalogs and on packaging, the letter at the end of the product name indicates the color. Specifications and operations are the same regardless of color.

■ Installing the batteries

Note

- If the remote controller doesn't work reliably, try replacing the batteries.
- Don't mix new and old batteries or different types of batteries.
- If you intend not to use the remote controller for a long time, remove the batteries to prevent damage from leakage or corrosion.
- Remove expired batteries as soon as possible to prevent damage from leakage or corrosion.

■ Aiming the remote controller

To use the remote controller, point it at the AV receiver's remote control sensor, as shown below.

Thank you for purchasing an Onkyo AV Receiver. Please read this manual thoroughly before making connections and plugging in the unit. Following the instructions in this manual will enable you to obtain optimum performance and listening enjoyment from your new AV Receiver. Please retain this manual for future reference.

To reset the AV receiver to its factory defaults, turn it on and, while holding down VCR/DVR, press  **ON/STANDBY** (→ [page 51](#)).

Features

Amplifier

- 100 Watts/Channel @ 6 ohms (IEC)
- Optimum Gain Volume Circuitry
- H.C.P.S. (High Current Power Supply) Massive High Power Transformer

Processing

- HDMI (Audio Return Channel, 3D, DeepColor, x.v.Color, Lip Sync, DTS-HD Master Audio, DTS-HD High Resolution Audio, Dolby TrueHD, Dolby Digital Plus, DSD and Multi-CH PCM)
- Non-Scaling Configuration
- A-Form Listening Mode Memory
- Direct Mode
- Music Optimizer for Compressed Digital Music files
- 192 kHz/24-bit D/A Converters
- Powerful and Highly Accurate 32-bit Processing DSP
- Jitter Cleaning Circuit Technology

Connections

- 4 HDMI Inputs and 1 Output
- Onkyo **RIHD** for System Control
- 3 Digital Inputs (2 Optical/1 Coaxial)
- Component Video Switching (2 Inputs/1 Output)
- Universal Port for the Dock for iPod®/iPhone®/DAB+ tuner module

Miscellaneous

- 40 FM/AM Presets
- EX.BASS for natural deeper bass
- Crossover Adjustment
(40/50/60/70/80/90/100/120/150/200 Hz)
- A/V Sync Control Function (up to 400 ms)
- Auto Standby Function
- On-Screen Display via HDMI

Front & Rear Panels

Front Panel

For detailed information, see the pages in parentheses.

- ① **ON/STANDBY button (18)**
- ② **HDMI THRU indicator (41)**
- ③ **SPEAKERS A and B buttons (28)**
- ④ **Remote control sensor (4)**
- ⑤ **LISTENING MODE buttons (23)**
- ⑥ **Display (8)**
- ⑦ **RT/PTY/TP button (21)**
- ⑧ **MEMORY button (21)**
- ⑨ **TUNING MODE button (20)**
- ⑩ **DISPLAY button (29)**
- ⑪ **SETUP button (32)**
- ⑫ **TUNING ▲/▼, PRESET ◀/▶ (20), cursor and ENTER buttons**
- ⑬ **RETURN button**
- ⑭ **MASTER VOLUME control (19)**
- ⑮ **MUSIC OPTIMIZER button (30, 43)**
- ⑯ **PHONES jack (31)**
- ⑰ **TONE and Tone Level buttons (42)**
- ⑱ **Input selector buttons (19)**
- ⑲ **AUX INPUT AUDIO and VIDEO jacks (15)**

Display

For detailed information, see the pages in parentheses.

- ① **A and B speaker indicators (28)**
- ② **M. Opt indicator (30, 43)**
- ③ **Listening mode and format indicators (23, 39)**
- ④ **Tuning indicators**
 - RDS indicator (21)**
 - AUTO indicator (20)**
 - TUNED indicator (20)**
 - FM STEREO indicator (20)**
- ⑤ **SLEEP indicator (29, 40)**
- ⑥ **HDMI indicator (41, 56)**
- ⑦ **MUTING indicator (30)**
- ⑧ **Message area**

Rear Panel

- ① **DIGITAL IN COAXIAL and OPTICAL** jacks
- ② **COMPONENT VIDEO IN and OUT** jacks
- ③ **HDMI IN and OUT** jacks
- ④ **FM ANTENNA** jack and **AM ANTENNA** terminal
- ⑤ **UNIVERSAL PORT** jack
- ⑥ **SPEAKERS** terminals
(FRONT A, CENTER, SURROUND, SUBWOOFER, FRONT B)
- ⑦ **Power cord**
- ⑧ **RI REMOTE CONTROL** jack
- ⑨ **Composite video and analog audio jacks**
(BD/DVD IN, VCR/DVR IN and OUT, CBL/SAT IN, GAME IN, TV/CD IN)
- ⑩ **MONITOR OUT V** jack

See "Connecting the AV Receiver" for connection
(→ [pages 11 to 17](#)).

Remote Controller

Controlling the AV Receiver

To control the AV receiver, press **RECEIVER** to select Receiver mode.

You can also use the remote controller to control Onkyo Blu-ray Disc/DVD player, CD player, and other components.

See “Entering Remote Control Codes” for more details (→ page 47).

For detailed information, see the pages in parentheses.

- ① I/⏻ **ON/STANDBY** button (18)
- ② **REMOTE MODE/INPUT SELECTOR** buttons (19)
- ③ **TONE** and Tone Level buttons (42)
- ④ **SP A/B** button (28)
- ⑤ **▲/▼/◀/▶** and **ENTER** buttons
- ⑥ **SETUP** button (32)
- ⑦ **LISTENING MODE** buttons (23)
- ⑧ **DIMMER** button (29)
- ⑨ **DISPLAY** button (29)
- ⑩ **MUTING** button (30)
- ⑪ **VOL ▲/▼** button (19)
- ⑫ **RETURN** button
- ⑬ **AUDIO** button (28)
- ⑭ **SLEEP** button (29)

■ Controlling the tuner

To control the AV receiver’s tuner, press **TUNER** (or **RECEIVER**).

You can select AM or FM by pressing **TUNER** repeatedly.

- ① **▲/▼** buttons (20)
- ② **D.TUN** button (20)
- ③ **DISPLAY** button
- ④ **TUN MODE** button (20)
- ⑤ **CH +/-** button (21)
- ⑥ **Number** buttons (20)

Connecting the AV Receiver

Connecting Your Speakers

Connecting the Speaker Cables

The following illustration shows how to connect the speakers to each pair of terminals.

■ Using a Passive Subwoofer

To find the best position for your subwoofer, while playing a movie or some music with good bass, experiment by placing your subwoofer at various positions within the room, and choose the one that provides the most satisfying results.

■ Push-type speaker terminals

Strip 10 to 12 mm of insulation from the ends of the speaker cables, and twist the bare wires tightly, as shown (Supplied speaker cables are already stripped).

Speaker Configuration

The following table indicates the channels you should use depending on the number of speakers that you have.

No matter how many speakers you use, a passive subwoofer is recommended for a really powerful and solid bass.

To get the best from your surround sound system, you need to set the speaker settings manually (→ [page 35](#)).

Number of speakers	2	3	4	5
Front speakers	✓	✓	✓	✓
Center speaker		✓		✓
Surround speakers			✓	✓

Connecting the Speaker Cables

The speaker terminals are color-coded for identification purpose.

Speaker	Color
Front left	White
Front right	Red
Center	Green
Surround left	Blue
Surround right	Gray
Subwoofer	Purple

Speaker Connection Precautions

Read the following before connecting your speakers:

- You can connect speakers with an impedance of between 6 and 16 ohms. If you use speakers with a lower impedance, and use the amplifier at high volume levels for a long period of time, the built-in amp protection circuit may be activated.
- Disconnect the power cord from the wall outlet before making any connections.
- Read the instructions supplied with your speakers.
- Pay close attention to speaker wiring polarity. In other words, connect positive (+) terminals only to positive (+) terminals, and negative (–) terminals only to negative (–) terminals. If you get them the wrong way around, the sound will be out of phase and will sound unnatural.
- Unnecessarily long, or very thin speaker cables may affect the sound quality and should be avoided.
- Be careful not to short the positive and negative wires. Doing so may damage the AV receiver.
- Make sure the metal core of the wire does not have contact with the AV receiver's rear panel. Doing so may damage the AV receiver.

- Don't connect more than one cable to each speaker terminal. Doing so may damage the AV receiver.
- Don't connect one speaker to several terminals.

About AV Connections

Connecting AV components

HDMI cable

Other cables

- Before making any AV connections, read the manuals supplied with your AV components.
- Don't connect the power cord until you've completed and double-checked all AV connections.
- Push plugs in all the way to make good connections (loose connections can cause noise or malfunctions).
- To prevent interference, keep audio and video cables away from power cords and speaker cables.

AV Cables and Jacks

HDMI

HDMI connections can carry digital video and audio.

Component video

Component video separates the luminance (Y) and color difference signals (Pb, Pr), providing the best picture quality (some TV manufacturers label their component video sockets slightly differently).

Composite video

Composite video is commonly used on TVs, VCRs, and other video equipment.

Optical digital audio

Optical digital connections allow you to enjoy digital sound such as PCM^{*1}, Dolby Digital or DTS. The audio quality is the same as coaxial.

Coaxial digital audio

Coaxial digital connections allow you to enjoy digital sound such as PCM^{*1}, Dolby Digital or DTS. The audio quality is the same as optical.

Analog audio (RCA)

Analog audio connections (RCA) carry analog audio.

*1 Available sampling rate for PCM input signal (stereo/mono) is 32/44.1/48/88.2/96 kHz. In case of an HDMI connection, 176.4/192 kHz is also available.

Note

- The AV receiver does not support SCART plugs.
- The AV receiver's optical digital jacks have shutter-type covers that open when an optical plug is inserted and close when it's removed. Push plugs in all the way.

Caution

- To prevent shutter damage, hold the optical plug straight when inserting and removing.

Connecting Components with HDMI

- * If your TV doesn't support Audio Return Channel (ARC), you need to connect an optical digital cable together with the HDMI cable to the AV receiver.
- * When listening to an HDMI component through the AV receiver, set the HDMI component so that its video can be seen on the TV screen (on the TV, select the input of the HDMI component connected to the AV receiver). If the TV power is off or the TV is set to another input source, this may result in no sound from the AV receiver or the sound may be cut off.

Connect your components to the appropriate jacks. The default input assignments are shown below.

✓: Assignment can be changed (→ [page 34](#)).

Jack	Components	
HDMI IN1	Blu-ray Disc/DVD player	✓
HDMI IN2	VCR or DVD recorder/digital video recorder	✓
HDMI IN3	Satellite/cable set-top box, etc.	✓
HDMI IN4	Game console	✓
HDMI OUT	TV, projector, etc.	

See also:

- “Connection Tips and Video Signal Path” (→ [page 56](#))
- “Using an RIHD-compatible TV, Player, or Recorder” (→ [page 57](#))
- “About HDMI” (→ [page 59](#))

Tip

- To listen to the audio of a component connected via HDMI through your TV's speakers, enable “HDMI Through” (→ [page 41](#)) and set the AV receiver to standby mode.

Note

- In the case of Blu-ray Disc/DVD players, if no sound is output despite following the above-mentioned procedure, set your Blu-ray Disc/DVD player's HDMI audio settings to PCM.

■ Audio Return Channel (ARC) function

Audio Return Channel (ARC) function enables an HDMI capable TV to send the audio stream to the **HDMI OUT** of the AV receiver.

- This function can be used when:
 - Your TV is ARC capable, and
 - The **TV/CD** input selector is selected, and
 - “HDMI Ctrl (RIHD)” is set to “On” (→ [page 41](#)), and
 - “Audio Return Ch (ARC)” is set to “Auto” (→ [page 42](#)).

Connecting Your Components

Connect your components to the appropriate jacks. The default input assignments are shown below.

See “Connection Tips and Video Signal Path” for more information (→ [page 56](#)).

The on-screen menus appear only on a TV that is connected to the **HDMI OUT**. If your TV is connected to other video outputs, use the AV receiver’s display when changing settings.

✓: Assignment can be changed (→ [pages 34, 35](#)).

No.	Jack/Port	Components	
1	AUX INPUT		
	VIDEO	Camcorder, etc.	
	AUDIO L/R		
2	DIGITAL IN		
	OPTICAL 1 (GAME)	Game console	✓
	OPTICAL 2 (TV/CD)	TV, CD player	✓
	COAXIAL (BD/DVD)	Blu-ray Disc/DVD player	✓
3	COMPONENT VIDEO		
	IN 1 (BD/DVD)	Blu-ray Disc/DVD player, RI dock	✓
	IN 2 (CBL/SAT)	Satellite/cable set-top box, RI dock, etc.	✓
	OUT	TV, projector, etc.	
	4	MONITOR OUT	TV, projector, etc.
4	BD/DVD IN	Blu-ray Disc/DVD player	
	VCR/DVR IN	VCR, DVD recorder/digital video recorder, RI dock	
	CBL/SAT IN	Satellite/cable set-top box, etc.	
	GAME IN	Game console, RI dock	
	TV/CD IN	TV, CD player, cassette tape deck, MD, CD-R, Turntable*1, RI dock	
5	UNIVERSAL PORT	Universal port option dock (UP-A1 etc.)	

Note

*1 Connect a turntable (MM) that has a phono preamp built-in. If your turntable (MM) doesn’t have it, you’ll need a commercially available phono preamp.

If your turntable has a moving coil (MC) type cartridge, you’ll need a commercially available MC head amp or MC transformer as well as a phono preamp. See your turntable’s manual for details.

- With connection [2], you can enjoy Dolby Digital and DTS.

- With connection [4], if your Blu-ray Disc/DVD player has both the main stereo and multichannel outputs, be sure to connect to the main stereo.

■ How to record a video source

With the connections described above, you cannot record the videos through the AV receiver. See “Recording” about connections for video recording (→ [page 31](#)).

Connecting Onkyo RI Components

- 1 Make sure that each Onkyo component is connected with an analog audio cable (connection 6 in the hookup examples) (→ page 15).
- 2 Make the RI connection (see the illustration).
- 3 If you're using an RI Dock or cassette tape deck, change the Input Display (→ page 30).

With **RI** (Remote Interactive), you can use the following special functions:

■ System On/Auto Power On

When you start playback on a component connected via **RI** while the AV receiver is on standby, the AV receiver will automatically turn on and select that component as the input source.

■ Direct Change

When playback is started on a component connected via **RI**, the AV receiver automatically selects that component as the input source.

■ Remote Control

You can use the AV receiver's remote controller to control your other **RI**-capable Onkyo components, pointing the remote controller at the AV receiver's remote control sensor instead of the component. You must enter the appropriate remote control code first (→ page 47).

Note

- Use only **RI** cables for **RI** connections. **RI** cables are supplied with Onkyo components.
- Some components have two **RI** jacks. You can connect either one to the AV receiver. The other jack is for connecting additional **RI**-capable components.
- Connect only Onkyo components to **RI** jacks. Connecting other manufacturer's components may cause a malfunction.
- Some components may not support all **RI** functions. Refer to the manuals supplied with your other Onkyo components.

Connecting a Recording Component

See “Recording” for details on recording (→ page 31).

Note

- The AV receiver must be turned on for recording. Recording is not possible while it's in standby mode.
- If you want to record directly from your TV or playback VCR to the recording VCR without going through the AV receiver, connect the TV/VCR's audio and video outputs directly to the recording VCR's audio and video inputs. See the manuals supplied with your TV and VCR for details.
- Video signals connected to composite video inputs can be recorded only via composite video outputs. For example, if your TV/VCR is connected to a composite video input, the recording VCR must be connected to a composite video output.
- The surround sound and DSP listening modes cannot be recorded.
- Copy-protected Blu-ray Discs and DVDs cannot be recorded.
- Sources connected to a digital input cannot be recorded. Only analog inputs can be recorded.
- DTS signals will be recorded as noise, so don't attempt analog recording of DTS CDs or LDs.

Connecting the Antennas

This section explains how to connect the supplied indoor FM antenna and AM loop antenna. The AV receiver won't pick up any radio signals without any antenna connected, so you must connect the antenna to use the tuner.

Note

- Once your AV receiver is ready for use, you'll need to tune into a radio station and position the antenna to achieve the best possible reception.
- Keep the AM loop antenna as far away as possible from your AV receiver, TV, speaker cables, and power cords.

Tip

- If you cannot achieve good reception with the supplied indoor FM antenna, try a commercially available outdoor FM antenna instead.
- If you cannot achieve good reception with the supplied indoor AM loop antenna, try using it with a commercially available outdoor AM antenna.

Connecting the Power Cord

1 Plug the power cord into an AC wall outlet.

Note

- Before connecting the power cord, connect all of your speakers and AV components.
- Turning on the AV receiver may cause a momentary power surge that might interfere with other electrical equipment on the same circuit. If this is a problem, plug the AV receiver into a different branch circuit.

Turning On/Off the AV Receiver

ON/STANDBY

Turning On

- 1 Press **ON/STANDBY** on the front panel.
or

Press **RECEIVER** followed by **I/ON/STANDBY** on the remote controller.

The AV receiver comes on, and its display lights.

Turning Off

- 1 Press **ON/STANDBY** on the front panel.
or

Press **RECEIVER** followed by **I/ON/STANDBY** on the remote controller.

The AV receiver will enter standby mode. To prevent any loud surprises when you turn on the AV receiver, always turn down the volume before you turn it off.

Tip

- For details on power management settings, see “Auto Standby” (→ [page 40](#)).

I/ON/STANDBY

RECEIVER

Playback

The on-screen menus appear only on a TV that is connected to the **HDMI OUT**. If your TV is connected to other video outputs, use the AV receiver's display when changing settings.

This section describes the procedure for using the remote controller unless otherwise specified.

Playing the Connected Component

Operating with the remote controller

- 1** Press **RECEIVER** followed by an **INPUT SELECTOR** button.
- 2** Start playback on the source component.
See also:
 - “Listening to AM/FM Radio” (→ [page 20](#))
 - “iPod/iPhone Playback via Onkyo Dock” (→ [page 44](#))
 - “Controlling Other Onkyo Components” (→ [page 47](#))
- 3** To adjust the volume, use **VOL ▲/▼**.
- 4** Select a listening mode and enjoy!
See also:
 - “Using the Listening Modes” (→ [page 23](#))

Operating on the AV receiver

- 1** Use the input selector buttons to select the input source.
- 2** Start playback on the source component.
- 3** To adjust the volume, use the **MASTER VOLUME** control.
- 4** Select a listening mode and enjoy!

Listening to AM/FM Radio

This section describes the procedure using the buttons on the front panel unless otherwise specified.

Using the Tuner

With the built-in tuner you can enjoy AM and FM radio stations. You can store your favorite stations as presets for quick selection.

You can also change the frequency steps (→ [page 40](#)).

- 1 Press **AM** or **FM** to select either “AM” or “FM”.
In this example, FM has been selected.

(Actual display depends on the country.)

Tuning into Radio Stations

Auto tuning mode

- 1 Press **TUNING MODE** so that the **AUTO** indicator lights on the AV receiver's display.
- 2 Press **TUNING ▲/▼**.
Searching stops when a station is found.
When tuned into a station, the **TUNED** indicator lights. When tuned into a stereo FM station, the **FM STEREO** indicator lights as shown.

Tip

- **Tuning into weak FM stereo stations**
If the signal from a stereo FM station is weak, it may be impossible to get good reception. In this case, switch to manual tuning mode and listen to the station in mono.
- Alternatively, you can use the remote controller's **TUN MODE** and **▲/▼** buttons.

Manual tuning mode

In manual tuning mode, FM stations will be in mono.

- 1 Press **TUNING MODE** so that the **AUTO** indicator goes off on the AV receiver's display.
- 2 Press and hold **TUNING ▲/▼**.
The frequency stops changing when you release the button.
Press the buttons repeatedly to change the frequency one step at a time.

Tip

- Alternatively, you can use the remote controller's **TUN MODE** and **▲/▼** buttons.

Tuning into stations by frequency

You can tune into AM and FM stations directly by entering the appropriate frequency.

- 1 On the remote controller, press **TUNER** repeatedly to select “AM” or “FM”, followed by **D.TUN**.

(Actual display depends on the country.)

- 2 Within 8 seconds, use the number buttons to enter the frequency of the radio station.

For example, to tune to 87.5 (FM), press **8, 7, 5**.

If you have entered the wrong number, you can retry after 8 seconds.

Presetting AM/FM Stations

You can store a combination of up to 40 of your favorite AM/FM radio stations as presets.

1 Tune into the AM/FM station that you want to store as a preset.

See the previous section.

2 Press MEMORY.

The preset number flashes.

(Actual display depends on the country.)

3 While the preset number is flashing (about 8 seconds), use PRESET ◀/▶ to select a preset from 1 through 40.

4 Press MEMORY again to store the station or channel.

The station or channel is stored and the preset number stops flashing.

Repeat this procedure for all of your favorite AM/FM radio stations.

■ Selecting Presets

1 To select a preset, use PRESET ◀/▶ on the AV receiver, or the remote controller's CH +/-.

Tip

- You can also use the remote controller's number buttons to select a preset directly.

■ Deleting Presets

1 Select the preset that you want to delete. See the previous section.

2 While holding down MEMORY, press TUNING MODE.

The preset is deleted and its number disappears from the AV receiver's display.

Using RDS

RDS works only in areas where RDS broadcasts are available.

When tuned into an RDS station, the **RDS** indicator lights. When the station is broadcasting text information, the text can be displayed.

■ What is RDS?

RDS stands for Radio Data System and is a method of transmitting data in FM radio signals. It was developed by the European Broadcasting Union (EBU) and is available in most European countries. Many FM stations use it these days. In addition to displaying text information, RDS can also help you find radio stations by type (e.g., news, sport, rock, etc.).

The AV receiver supports four types of RDS information:
PS (Program Service)

When tuned to an RDS station that's broadcasting PS information, the station's name will be displayed. Pressing **DISPLAY** will display the frequency for 3 seconds.

RT (Radio Text)

When tuned to an RDS station that's broadcasting text information, the text will be shown on the AV receiver's display as described in the next section.

PTY (Program Type)

This allows you to search for RDS radio stations by type (→ [page 22](#)).

TP (Traffic Program)

This allows you to search for RDS radio stations that broadcast traffic information (→ [page 22](#)).

↳ To be continued

Note

- In some cases, the text characters displayed on the AV receiver may not be identical to those broadcast by the radio station. Also, unexpected characters may be displayed when unsupported characters are received. This is not a malfunction.
- If the signal from an RDS station is weak, RDS data may be displayed intermittently or not at all.

■ Displaying Radio Text (RT)**1 Press RT/PTY/TP once.**

The RT information scrolls across the AV receiver's display.

Note

- The message “**Waiting**” may appear while the AV receiver waits for the RT information.
- If the message “**No Text Data**” appears, no RT information is available.

■ Finding Stations by Type (PTY)

You can search for radio stations by type.

1 Press RT/PTY/TP twice.

The current program type appears on the AV receiver's display.

2 Use PRESET ◀/▶ to select the type of program you want.

See the table shown later in this chapter.

3 To start the search, press ENTER.

The AV receiver searches until it finds a station of the type you specified, at which point it stops briefly before continuing with the search.

4 When a station you want to listen to is found, press ENTER.

If no stations are found, the message “**Not Found**” appears.

■ Listening to Traffic News (TP)

You can search for stations that broadcast traffic news.

1 Press RT/PTY/TP three times.

If the current radio station is broadcasting TP (Traffic Program), “[TP]” will appear on the AV receiver's display. If “TP” without square brackets appears, this means that the station is not broadcasting TP.

2 To locate a station that is broadcasting TP, press ENTER.

The AV receiver searches until it finds a station that's broadcasting TP.

If no stations are found, the message “**Not Found**” appears.

Using Basic Functions

Using the Listening Modes

Selecting Listening Modes

See “About Listening Modes” for detailed information about the listening modes (→ [page 24](#)).

■ Listening Mode Buttons

MOVIE/TV, MUSIC, GAME

MOVIE/TV button

This button selects the listening modes intended for use with movies and TV.

MUSIC button

This button selects the listening modes intended for use with music.

GAME button

This button selects the listening modes intended for use with video games.

STEREO button

This button selects the Stereo listening mode and All Channel Stereo listening mode.

- The Dolby Digital and DTS listening modes can only be selected if your Blu-ray Disc/DVD player is connected to the AV receiver with a digital audio connection (coaxial, optical, or HDMI).
- The listening modes you can select depends on the format of the input signal. To check the format, see “Displaying Source Information” (→ [page 29](#)).
- While a pair of headphones is connected, you can select the following listening modes: Direct, Stereo, and Mono.
- While Speakers A and B are on, you can select only the Direct, Stereo, Mono, or T-D (Theater-Dimensional) listening mode.

About Listening Modes

The AV receiver's listening modes can transform your listening room into a movie theater or concert hall, with high fidelity and stunning surround sound.

■ Explanatory Notes

- ① Front speakers
- ② Center speaker
- ③ Surround speakers
- ④ Subwoofer

Input Source

The following audio formats are supported by the listening mode.

MONO	This is mono (monophonic) sound.
STEREO	This is stereo (stereophonic) sound. Two independent audio signal channels are reproduced through two speakers.
5.1ch	This is 5.1-channel surround sound. This surround system has five main channels of sound and a sixth subwoofer channel (called the point-one channel).
7.1ch *1	This is 7.1-channel surround sound. This is a further sound enhancement to 5.1-channel sound with two additional speakers that provide greater sound envelopment and more accurate positioning of sounds.

*1 The AV receiver outputs this source in 5.1-channel surround sound.

Speaker Layout

The illustration shows which speakers are activated in each channel. See "Sp Config (Speaker Configuration)" for the speaker setup (→ [page 35](#)).

■ Onkyo-Original DSP Listening Modes

Listening Mode	Description	Input Source	Speaker Layout
Orchestra <i>Orchestra</i>	Suitable for classical or operatic music, this mode emphasizes the surround channels in order to widen the stereo image, and simulates the natural reverberation of a large hall.	MONO STEREO 5.1ch 7.1ch	5.1
Unplugged <i>Unplugged</i>	Suitable for acoustic instruments, vocals, and jazz, this mode emphasizes the front stereo image, giving the impression of being right in front of the stage.		
Studio-Mix <i>Studio-Mix</i>	Suitable for rock or pop music, listening to music in this mode creates a lively sound field with a powerful acoustic image, like being at a club or rock concert.		
TV Logic <i>TV Logic</i>	This mode adds realistic acoustics to TV shows produced in a TV studio, surround effects to the entire sound, and clarity to voices.		
Game-RPG <i>Game-RPG</i>	In this mode, the sound has a dramatic feel with a similar atmosphere to Orchestra mode.		
Game-Action <i>Game-Action</i>	In this mode, sound localization is distinct with emphasis on bass.		
Game-Rock <i>Game-Rock</i>	In this mode, sound pressure is emphasized to heighten live feel.		
Game-Sports <i>Game-Sports</i>	In this mode, reverberation is increased and sound localization decreased slightly.		
All Ch Stereo <i>All Ch Stereo</i>	Ideal for background music, this mode fills the entire listening area with stereo sound from the front and surround speakers.		3.1 5.1
Full Mono <i>Full Mono</i>	In this mode, all speakers output the same sound in mono, so the sound you hear is the same regardless of where you are within the listening room.		

Listening Mode	Description	Input Source	Speaker Layout
T-D (Theater-Dimensional) <i>T-D</i>	With this mode you can enjoy a virtual surround sound even with only two or three speakers. This works by controlling how sounds reach the listener's left and right ears. Good results may not be possible if there's too much reverb, so we recommend that you use this mode in an environment with little or no natural reverb.	MONO STEREO 5.1ch 7.1ch	2.1 3.1 5.1

■ Listening Modes

Listening Mode	Description	Input Source	Speaker Layout
Direct <i>Direct</i>	In this mode, audio from the input source is output without surround-sound processing. The speaker configuration (presence of speakers) and speaker distance settings are enabled, but much of the processing set via Home menu is disabled. A/V Sync does not have effect on the analog audio. See “On-screen Setup” for more details (→ page 32).	MONO STEREO 5.1ch 7.1ch	2.1 3.1 5.1
Stereo <i>Stereo</i>	Sound is output from the front left and right speakers and subwoofer.		
Mono <i>Mono</i>	Use this mode when watching an old movie with a mono soundtrack, or use it with the foreign language soundtracks recorded in the left and right channels of some movies. It can also be used with DVDs or other sources containing multiplexed audio, such as karaoke DVDs.		
Multichannel <i>Multich</i>	This mode is for use with PCM multichannel sources.	5.1ch 7.1ch	3.1 5.1

Listening Mode	Description	Input Source	Speaker Layout
DSD ¹ <i>DSD</i>	In this mode, audio from the input source is output without surround-sound processing. The speaker configuration (presence of speakers), crossover frequency, speaker distance, A/V Sync and much of the processing set via Home menu are enabled. See “On-screen Setup” for more details (→ page 32).	5.1ch	3.1 5.1
Dolby Digital <i>Dolby D</i>			
Dolby Digital Plus ² <i>Dolby D +</i>		5.1ch 7.1ch	3.1 5.1
Dolby TrueHD <i>Dolby TrueHD</i>			
DTS <i>DTS</i>		5.1ch	3.1 5.1
DTS-HD High Resolution Audio <i>DTS-HD HR</i>		5.1ch 7.1ch	
DTS-HD Master Audio <i>DTS-HD MSTR</i>			
DTS Express <i>DTS Express</i>		5.1ch	3.1 5.1
DTS 96/24 <i>DTS 96/24</i>		This mode is for use with DTS 96/24 sources. This is high-resolution DTS with a 96 kHz sampling rate and 24-bit resolution, providing superior fidelity. Use it with DVDs that bear the DTS 96/24 logo.	

Listening Mode	Description	Input Source	Speaker Layout
Dolby Pro Logic II	Dolby Pro Logic II expands any 2-channel source for 5.1-channel playback. It provides a very natural and seamless surround-sound experience that fully envelops the listener. As well as music and movies, video games can also benefit from the dramatic spatial effects and vivid imaging.		
<i>PLII Movie</i>	<ul style="list-style-type: none"> • Dolby PLII Movie Use this mode with DVDs and videos that bear the Dolby Surround logo or TV shows that feature Dolby Surround. You can also use this mode with stereo movies or TV shows and the AV receiver will create a 5.1 surround mix from the 2-channel stereo. • Dolby PLII Music Use this mode to add 5.1 surround to stereo sources such as music CDs and DVDs. • Dolby PLII Game Use this mode when playing game discs. 	STEREO	3.1 5.1
<i>PLII Music</i>			
<i>PLII Game</i>			
Neo:6	This mode expands any 2-channel source for up to 5.1-channel playback. It uses seven full-bandwidth channels of matrix decoding for matrix-encoded material, providing a very natural and seamless surround sound experience that fully envelops the listener.		
<i>Neo:6 Cinema</i>	<ul style="list-style-type: none"> • Neo:6 Cinema Use this mode with any stereo movie (e.g., TV, DVD, VHS). • Neo:6 Music Use this mode with any stereo music source (e.g., CD, radio, cassette, TV, VHS, DVD). 	STEREO	3.1 5.1
<i>Neo:6 Music</i>			

Note

- *1 The AV receiver can input the DSD signal from HDMI IN. Setting the output setting on the player side to PCM might obtain a better sound according to the player. In that case, set the output setting on the player side to PCM.
- *2 For the Blu-ray Discs, Dolby Digital is used.
- The listening modes cannot be selected with some source formats.

Using the Home Menu

The Home menu provides quick access to frequently used settings. You can change settings and view the current information.

The on-screen menus appear only on a TV that is connected to the HDMI OUT. If your TV is connected to other video outputs, use the AV receiver's display when changing settings.

Note

- The on-screen menus are displayed when:
 - There is no video input, or
 - The video input is 480p, 576p, 720p, 1080i, or 1080p.

1 Press RECEIVER followed by AUDIO.

The Home menu will be superimposed on the TV screen.

2 Use ▲/▼ and ENTER to make the desired selection.

■ Input

- ▶ You can select the input source.
 - Use ▲/▼ to select the desired input source.
 - Pressing **ENTER** switches to the selected input source.

■ Audio

- ▶ You can change the following settings: “Bass”, “Treble”, “Subwoofer Level”, “Center Level”, “EX.BASS”, “Late Night”, “Music Optimizer”, and “Cinema Filter”.

See also:

- “Using the Audio Settings” (→ [page 42](#))

■ Info^{*1}

- ▶ You can view the information of the following items: “Input” and “Output”.

■ Listening Mode^{*2}

- ▶ You can select the listening modes that are grouped in the following categories: “MOVIE/TV”, “MUSIC” and “GAME”.
 - Use ▲/▼ to select the category and ◀/▶ to select the listening mode. Press **ENTER** to switch to the selected listening mode.

Note

- ^{*1} Depending on the input source and listening mode, not all channels shown here output the sound.
- ^{*2} • This setting is not available in either of the following cases:
 - The “Audio TV Out” setting is set to “On” (→ [page 41](#)).
 - “HDMI Ctrl (RIHD)” is set to “On” (→ [page 41](#)) and you're listening through your TV speakers.

Selecting Speakers A and B

You can use two sets of front speakers with the AV receiver: *Speakers A* for up to 5.1-channel playback in your main listening room and *Speakers B* for 2-channel stereo playback in another room.

- 1** Press **RECEIVER** once followed by **SP A/B** repeatedly to cycle through the selection:
- Speakers A → Speakers A&B → Speakers B

↑
←
Off

Speaker indicators and output channels are shown below.

Speaker indicators	Output channel
[A]	Speakers A: 5.1 channels
[A] [B]	Speakers A: 2.1 channels ^{*3} Speakers B: 2 channels
[B]	Speakers B: 2 channels
	No sound

^{*3} While Speakers B is on, channels are reduced to 2.1 in the main room.

Tip

- Alternatively, you can use the AV receiver's **SPEAKERS A** and **B**.

Using the Sleep Timer

With the sleep timer, you can set the AV receiver to turn off automatically after a specified period.

1 Press RECEIVER once followed by SLEEP repeatedly to select the required sleep time.

The sleep time can be set from 90 to 10 minutes in 10 minute steps.

The **SLEEP** indicator lights on the AV receiver's display when the sleep timer has been set. The specified sleep time appears for about 5 seconds, then the previous display reappears.

Tip

- If you need to cancel the sleep timer, press **SLEEP** repeatedly until the **SLEEP** indicator goes off.
- To check the time remaining until the AV receiver sleeps, press **SLEEP**. Note that if you press again on **SLEEP** as the time being displayed is equal to 10 minutes or less, the sleep timer will go off.

Setting the Display Brightness

You can adjust the brightness of the AV receiver's display.

1 Press RECEIVER once followed by DIMMER repeatedly to switch between: normal, dim, or dimmer brightness.

Displaying Source Information

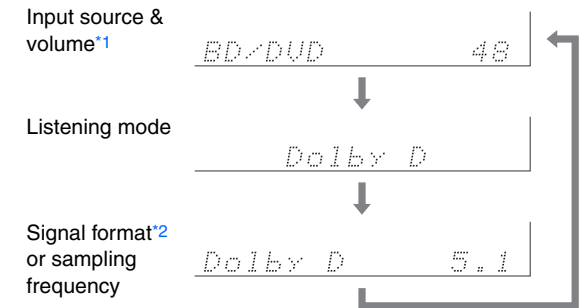

You can display various information about the current input source as follows. (Components connected to the **UNIVERSAL PORT** jack are excluded.)

1 Press RECEIVER once followed by DISPLAY repeatedly to cycle through the available information.

Tip

- Alternatively, you can use the AV receiver's **DISPLAY**.

The following information can typically be displayed.

*1 When AM or FM radio is used, the band, frequency, and preset number are displayed.

*2 If the input signal is digital, the signal format is displayed. Information is displayed for about three seconds, then the previously displayed information reappears.

Changing the Input Display

When you connect an **RI**-capable Onkyo component, you must configure the input display so that **RI** can work properly.

This setting can be done only from the front panel.

1 Press **TV/CD**, **GAME** or **VCR/DVR**.

“**TV/CD**”, “**GAME**” or “**VCR/DVR**” appears on the AV receiver’s display.

2 Press and hold down the same button (about 3 seconds) to change the input display.

Repeat this step to select the desired input display.

■ **TV/CD:** TV/CD → DOCK
 ↑ TAPE ←

■ **GAME:** GAME ↔ DOCK

■ **VCR/DVR:** VCR/DVR ↔ DOCK

Note

- “**DOCK**” can be selected for the “**TV/CD**”, “**GAME**” or “**VCR/DVR**” input selector, but not at the same time.
- Enter the appropriate remote control code before using the remote controller for the first time (→ [page 47](#)).

Using the Music Optimizer

The Music Optimizer function enhances the sound quality of compressed music files.

1 Press **MUSIC OPTIMIZER** on the front panel.

The **M.Opt** indicator lights on the AV receiver’s display.

Tip

- Alternatively, you can use the remote controller’s **AUDIO**.
- See “Music Optimizer” for more details (→ [page 43](#)).

Muting the AV Receiver

You can temporarily mute the output of the AV receiver.

1 Press **RECEIVER** followed by **MUTING**.

The output is muted and the **MUTING** indicator flashes on the AV receiver’s display.

Tip

- To unmute, press **MUTING** again or adjust the volume.
- Muting is automatically cancelled when the AV receiver is set to standby.

Using Headphones

- 1 **Connect a pair of stereo headphones with a standard plug (6.3 mm) to the PHONES jack.**

Note

- Always turn down the volume before connecting your headphones.
- While the headphones plug is inserted in the **PHONES** jack, the speakers are turned off.
- When you connect a pair of headphones, the listening mode is set to Stereo, unless it's already set to Stereo, Mono, or Direct.

Recording

This section explains how to record the selected input source to a component with recording capability.

AV Recording

Audio sources can be recorded to a recorder (e.g., cassette tape deck, CDR, MD recorder). Video sources can be recorded to a video recorder (e.g., VCR, DVD recorder).

- 1 **Use the input selector buttons to select the source that you want to record.**

You can watch the source while recording. The AV receiver's **MASTER VOLUME** control has no effect on recording.

- 2 **On your recorder, start recording.**

- 3 **On the source component, start playback.**

If you select another input source during recording, that input source will be recorded.

On-screen Setup

The setup menus provides a convenient way to change the AV receiver's various settings. Settings are organized into 10 categories.

The on-screen menus appear only on a TV that is connected to the HDMI OUT. If your TV is connected to other video outputs, use the AV receiver's display when changing settings.

This section describes the procedure for using the remote controller unless otherwise specified.

Note

- The on-screen menus are displayed when:
 - There is no video input, or
 - The video input is 480p, 576p, 720p, 1080i, or 1080p.

Common Procedures in Setup Menu

- 1 Press **RECEIVER** followed by **SETUP**.
- 2 Use **▲/▼** to select a menu item, and then press **ENTER**.
- 3 Use **▲/▼** to select a setting target, and use **◀/▶** to change the setting.
 Press **SETUP** to close the menu.
 Press **RETURN** to return to the previous menu.

Note

- This procedure can also be performed on the AV receiver by using **SETUP**, the cursor buttons, and **ENTER**.

HDMI Input

Menu HDMI Input

If you connect a video component to an HDMI input, you must assign that input to an input selector. For example, if you connect your Blu-ray Disc/DVD player to **HDMI IN 2**, you must assign “**HDMI2**” to the “**BD/DVD**” input selector.

Here are the default assignments.

Input selector	Default assignment
BD/DVD	HDMI1
VCR/DVR	HDMI2
CBL/SAT	HDMI3
GAME	HDMI4
AUX	-----
TV/CD	-----
PORT	-----

■ BD/DVD, VCR/DVR, CBL/SAT, GAME, AUX, TV/CD, PORT

▶ HDMI1, HDMI2, HDMI3, HDMI4:

Select the input to which the component has been connected.

▶ -----:

Select if you're not using the **HDMI OUT**.

Each HDMI input cannot be assigned to two input selectors or more. When **HDMI1 - HDMI4** have already been assigned, you must first set any unused input selectors to “-----” or you will be unable to assign **HDMI1 - HDMI4** to input selector.

Note

- If no video component is connected to HDMI output (even if the HDMI input is assigned), the AV receiver selects the video source based on the setting of “Component (Component Video Input)”.
- When an **HDMI IN** is assigned to an input selector as explained here, the same **HDMI IN** will be set as a priority in the “Digital Audio (Digital Audio Input)” (→ [page 35](#)). In this case, if you want to use the coaxial or optical audio input, make the appropriate selection in the “**Audio Selector**” setting (→ [page 39](#)).
- Do not assign an **HDMI IN** to the **TV/CD** selector while “**HDMI Ctrl (RIHD)**” is set to “**On**” (→ [page 41](#)), otherwise appropriate CEC (Consumer Electronics Control) operation will not be guaranteed.
- If you assign “-----” to an input selector that is currently selected in “**HDMI Through**” (→ [page 41](#)), the “**HDMI Through**” setting will be automatically switched to “**Off**”.
- The “**TUNER**” selector cannot be assigned and is fixed at the “-----” option.
- If you connect a component (such as UP-A1 Dock with docked iPod/iPhone) to the **UNIVERSAL PORT** jack, you cannot assign any input to the “**PORT**” selector.

Component (Component Video Input)

Menu Component

If you connect a video component to a component video input, you must assign that input to an input selector. For example, if you connect your Blu-ray Disc/DVD player to **COMPONENT VIDEO IN 2**, you must assign “**IN2**” to the “**BD/DVD**” input selector.

Here are the default assignments.

Input selector	Default assignment
BD/DVD	IN1
VCR/DVR	-----
CBL/SAT	IN2
GAME	-----
AUX	-----
TV/CD	-----
PORT	-----

■ BD/DVD, VCR/DVR, CBL/SAT, GAME, AUX, TV/CD, PORT

▶ IN1, IN2:

Select the input to which the component has been connected.

▶ -----:

Select if you're not using the **COMPONENT VIDEO OUT**.

Note

- The “**TUNER**” selector cannot be assigned and is fixed at the “-----” option.
- If you connect a component (such as UP-A1 Dock with docked iPod/iPhone) to the **UNIVERSAL PORT** jack, you cannot assign any input to the “**PORT**” selector.

Digital Audio (Digital Audio Input)

Menu Digital Audio

If you connect a component to a digital audio input, you must assign that input to an input selector. For example, if you connect your CD player to the **OPTICAL IN 1**, you must assign “**OPTICAL1**” to the “**TV/CD**” input selector. Here are the default assignments.

Input selector	Default assignment
BD/DVD	COAXIAL
VCR/DVR	-----
CBL/SAT	-----
GAME	OPTICAL1
AUX	-----
TV/CD	OPTICAL2
PORT	-----

■ BD/DVD, VCR/DVR, CBL/SAT, GAME, AUX, TV/CD, PORT

▶ COAXIAL, OPTICAL1, OPTICAL2:

Select the input to which the component has been connected.

▶ -----:

Select if the component is connected to an analog audio input.

Note

- When an **HDMI IN** is assigned to an input selector in “**HDMI Input**” (→ [page 34](#)), the same **HDMI IN** will be set as a priority in this assignment. In this case, if you want to use the coaxial or optical audio input, make the appropriate selection in the “**Audio Selector**” (→ [page 39](#)).
- Available sampling rates for PCM signals (stereo/mono) from a digital input (optical and coaxial) are 32/44.1/48/88.2/96 kHz/16, 20, 24 bit.
- The “**TUNER**” selector cannot be assigned and is fixed at the “-----” option.
- If you connect a component (such as UP-A1 Dock with docked iPod/iPhone) to the **UNIVERSAL PORT** jack, you cannot assign any input to the “**PORT**” selector.

Sp Config (Speaker Configuration)

Menu Sp Config

This section explains how to specify which speakers are connected and their sizes.

For speakers with a cone diameter larger than 16 cm, specify **Large** (full band). For those with a smaller diameter, specify **Small** (default crossover 150 Hz).

The crossover frequency can be changed in the “Crossover (Crossover Frequency)” (→ [page 36](#)).

Note

- These settings are not available in either of the following cases:
 - A pair of headphones is connected.
 - The “**Audio TV Out**” setting is set to “**On**” (→ [page 41](#)).
 - “**HDMI Ctrl (RIHD)**” is set to “**On**” (→ [page 41](#)) and you’re listening through your TV speakers.
 - Speakers B is on.
 - Speakers A is off.

■ Subwoofer

- ▶ Yes
- ▶ No

↳ To be continued

■ Front

▶ Small:

▶ Large:

Select based on the cone diameter.

Note

- If the “Subwoofer” setting is set to “No”, this setting is fixed to “Large”.

■ Center*1, Surround*1

▶ Small:

▶ Large:

Select based on the cone diameter.

▶ None

Note

- *1 If the “Front” setting is set to “Small”, the “Large” option cannot be selected.

■ Crossover (Crossover Frequency)

This setting is advantageous for the speakers that you specified as “Small” in the “Sp Config (Speaker Configuration)” (→ [page 35](#)). To get the best bass performance from your speaker system, you need to set the crossover frequency according to the size and frequency response of your speakers.

▶ **40Hz, 50Hz, 60Hz, 70Hz, 80Hz, 90Hz, 100Hz, 120Hz, 150Hz, 200Hz**

Use the diameter of the smallest speaker in your system when choosing the crossover frequency.

Speaker cone diameter	Crossover frequency
Over 20 cm	40/50/60 Hz*2
16 to 20 cm	70/80/90 Hz*2
13 to 16 cm	100 Hz
9 to 13 cm	120 Hz
Under 9 cm	150/200 Hz*2

- *2 Choose the setting suitable for the speaker.

Note

- For a more accurate setting, look up the frequency response in the manuals supplied with your speakers and set accordingly.
- Choose a higher crossover frequency if you want more sound from your subwoofer.

■ Double Bass

▶ On

▶ Off

Turn this setting on to boost bass output by feeding bass sounds from the front left, right, and center channels to the subwoofer.

Note

- When the “Subwoofer” setting is set to “No” or the “Front” setting to “Small”, this setting is fixed to “Off” (→ [page 35](#)).
- This setting is set to “On” automatically when the “Subwoofer” and “Front” settings are set for the first time to “Yes” and “Large” respectively.

■ Wireless Front, Wireless Surr (Surround)*1

When an optional unit is connected to the **UNIVERSAL PORT** jack on the AV receiver, the speaker setting menu may appear on-screen.

▶ Yes:

The audio is output from the speakers connected to the wireless unit.

▶ No:

The audio is not output from the speakers connected to the wireless unit.

When the wireless unit is connected to the **UNIVERSAL PORT** jack on the AV receiver, you can select if you wish to output the audio from the speakers connected to the wireless unit.

Note

- When no wireless unit is connected to the **UNIVERSAL PORT** jack on the AV receiver, this setting is not available.

- *1 If the “Surround” setting is set to “None”, this setting cannot be selected.

Sp Distance (Speaker Distance)

Menu

Sp Distance

Here you can specify the distance from each speaker to the listening position so that the sound from each speaker arrives at the listener’s ears as the sound designer intended.

Note

- These settings are not available in either of the following cases:
 - A pair of headphones is connected.
 - The “Audio TV Out” setting is set to “On” (→ [page 41](#)).
 - “HDMI Ctrl (RIHD)” is set to “On” (→ [page 41](#)) and you’re listening through your TV speakers.
 - Speakers B is on.
 - Speakers A is off.

■ Unit

▶ feet:

Distances can be set in feet. Range: **1ft to 30ft** in 1 foot steps.

▶ meters:

Distances can be set in meters. Range: **0.3m to 9.0m** in 0.3 meter steps.

■ Left, Center, Right, Surround Right, Surround Left, Subwoofer

▶ Specify the distance from the each speaker to your listening position.

Note

- Speakers that you set to “No” or “None” in the “Sp Config (Speaker Configuration)” (→ [page 35](#)) cannot be selected.

Level Cal (Level Calibration)

Menu

Level Cal

Here you can adjust the level of each speaker with the built-in test tone so that the volume of each speaker is the same at the listening position.

Note

- These settings cannot be calibrated in either of the following cases:
 - A pair of headphones is connected.
 - The “**Audio TV Out**” setting is set to “**On**” (→ [page 41](#)).
 - “**HDMI Ctrl (RIHD)**” is set to “**On**” (→ [page 41](#)) and you’re listening through your TV speakers.
 - Speakers B is on.
 - Speakers A is off.
 - The AV receiver is muted.

■ Left, Center^{*1}, Right, Surround Right, Surround Left

▶ **-12 dB** to **0 dB** to **+12 dB** in 1 dB step.

■ Subwoofer^{*1}

▶ **-15 dB** to **+3 dB** to **+12 dB** in 1 dB step.

Note

- Speakers that you set to “**No**” or “**None**” in the “Sp Config (Speaker Configuration)” (→ [page 35](#)) cannot be selected.
- *1 For the center speaker and subwoofer, the level settings made by using the Home menu are saved in this menu (→ [page 28](#)).

Tip

- If you’re using a handheld sound level meter, adjust the level of each speaker so that it reads 75 dB SPL at the listening position, measured with C-weighting and slow reading.

Audio Adjust

Menu

Audio Adjust

With the Audio Adjust functions and settings, you can adjust the sound and listening modes as you like.

Multiplex/Mono

■ Multiplex

Input Ch (Mux)

- ▶ **Main**
- ▶ **Sub**
- ▶ **Main/Sub**

This setting determines which channel of a stereo multiplex source is output. Use it to select audio channels or languages with multiplex sources, multilingual TV broadcasts, and so on.

■ Mono

Input Ch (Mono)

- ▶ **Left + Right**
- ▶ **Left**
- ▶ **Right**

This setting specifies the channel to be used for playing any 2-channel digital source such as Dolby Digital, or 2-channel analog/PCM source in the Mono listening mode.

Dolby

■ PL II Music (2ch Input)

These settings apply to only 2-channel stereo sources.

Panorama

- ▶ **On**
- ▶ **Off**

With this setting, you can broaden the width of the front stereo image when using the Dolby Pro Logic II Music listening mode.

Dimension

- ▶ **-3** to **0** to **+3**

With this setting, you can move the sound field forward or backward when using the Dolby Pro Logic II Music listening mode. Higher settings move the sound field backward. Lower settings move it forward.

If the stereo image feels too wide, or there’s too much surround sound, move the sound field forward to improve the balance. Conversely, if the stereo image feels like it’s in mono, or there’s not enough surround sound, move it backward.

Center Width

- ▶ **0** to **3** to **7**

With this setting, you can adjust the width of the sound from the center speaker when using the Dolby Pro Logic II Music listening mode. Normally, if you’re using a center speaker, the center channel sound is output from only the center speaker. (If you’re not using a center speaker, the center channel sound will be distributed to the front left and right speakers to create a phantom center). This setting controls the front left, right, and center mix, allowing you to adjust the weight of the center channel sound.

DTS

■ Neo:6 Music

Center Image

▶ 0 to 2 to 5

With this setting, you can specify by how much the front left and right channel output is attenuated in order to create the center channel.

Changing the value from “**0**” to “**5**” will spread the sound of the center channel to left and right (outwards).

Theater-Dimensional

■ Listening Angle

▶ Wide:

Select if the listening angle is 40 degrees.

▶ Narrow:

Select if the listening angle is 20 degrees.

With this setting, you can optimize the Theater-Dimensional listening mode by specifying the angle of the front left and right speakers relative to the listening position. Ideally, the front left and right speakers should be equidistant from the listening position and at an angle close to one of the two available settings.

Source Setup

Items can be set individually for each input selector.

Preparation

Press the input selector buttons to select an input source.

Menu

Source Setup

A/V Sync

■ A/V Sync

▶ 0 ms to 400 ms in 10 msec steps

When using progressive scanning on your Blu-ray Disc/DVD player, you may find that the picture and sound are out of sync. With this setting, you can correct this by delaying the audio signals.

To view the TV picture while setting the delay, press

ENTER.

To return to the previous screen, press **RETURN**.

The range of values you can adjust will depend on whether your TV supports HDMI Lip Sync and if the “**LipSync**” setting is set to “**On**” or not (→ [page 42](#)).

Note

- A/V Sync is disabled when the Direct listening mode is used with an analog input source.

Preset Name For Input Selector

■ Name

▶ - - -, Blu-ray, DVD, HD DVD, VCR, DVR, Tivo, CableSTB, SAT STB, PS3, Wii, Xbox, PC, TV, CD, TAPE, iPod:

To reset to the default, select “- - -”.

You can enter a preset name for each individual input selector for easy identification. When entered, the preset name will be displayed.

Note

- You can’t assign the same preset name to multiple input selectors.
- This setting cannot be used for the **TUNER (AM, FM)** input selector.

Audio Selector

■ Audio Selector

▶ ARC:

The audio signal from your TV tuner can be sent to the **HDMI OUT** of the AV receiver.*1

With this selection, the TV's audio can be automatically selected as a priority among other assignments.

▶ HDMI:

This can be selected when **HDMI IN** has been assigned as an input source. If both HDMI (**HDMI IN**) and digital audio inputs (**COAXIAL IN** or **OPTICAL IN**) have been assigned, HDMI input is automatically selected as a priority.

▶ COAXIAL:

This can be selected when **COAXIAL IN** has been assigned as an input source. If both coaxial and HDMI inputs have been assigned, coaxial input is automatically selected as a priority.

▶ OPTICAL:

This can be selected when **OPTICAL IN** has been assigned as an input source. If both optical and HDMI inputs have been assigned, optical input is automatically selected as a priority.

▶ Analog:

The AV receiver always outputs analog signals.

You can set priorities of audio output when there are both digital and analog inputs.

Note

- This setting can be made only for the input source that is assigned as **HDMI IN**, **COAXIAL IN**, or **OPTICAL IN**.

*1 You can select "ARC" if you select the **TV/CD** input selector. But you cannot if you've selected "Off" in the "Audio Return Ch" setting (→ [page 42](#)).

Setting the Incoming Digital Signal (Fixed Mode)

■ Fixed Mode

▶ Off:

The format is detected automatically. If no digital input signal is present, the corresponding analog input is used instead.

▶ PCM:

Only 2-channel PCM format input signals will be heard. If the input signal is not PCM, the **PCM** indicator will flash and noise may also be produced.

▶ DTS:

Only DTS (but not DTS-HD) format input signals will be heard. If the input signal is not DTS, the **dts** indicator will flash and there will be no sound.

When "HDMI", "COAXIAL" or "OPTICAL" is selected in the "Audio Selector" setting, you can then specify the signal type in "Fixed Mode".

Normally, the AV receiver detects the signal format automatically. However, if you experience either of the following issues when playing PCM or DTS material, you can manually set the signal format to PCM or DTS.

- If the beginnings of tracks from a PCM source are cut off, try setting the format to PCM.
- If noise is produced when fast forwarding or reversing a DTS CD, try setting the format to DTS.

Note

- The setting will be reset to "Off" when you change the setting in the "Audio Selector" (→ [page 39](#)).

Hardware

Menu

Hardware

OSD

■ Volume OSD

- ▶ On
- ▶ Off

Turn this setting on to display the volume level on the TV screen while it is adjusted.

Remote ID

■ Remote ID

- ▶ 1, 2, or 3

When several Onkyo components are used in the same room, their remote ID codes may overlap. To differentiate the AV receiver from the other components, you can change its remote ID from "1", to "2" or "3".

Note

- If you do change the AV receiver's remote ID, be sure to change the remote controller to the same ID (see below), otherwise, you won't be able to control it with the remote controller.

Changing the remote controller's ID

- 1 While holding down **RECEIVER**, press and hold down **SETUP** until the remote indicator lights (about 3 seconds).
- 2 Use the number buttons to enter ID 1, 2, or 3. The remote indicator flashes twice.

Tuner

■ AM Freq Step

▶ 10kHz:

▶ 9kHz:

Select the frequency step according to your area.

For AM tuning to work properly, you must specify the AM frequency step used in your area.

Note

- When this setting is changed, all radio presets will be deleted.

Auto Standby

■ Auto Standby

▶ Off

▶ On

When “**Auto Standby**” is set to “**On**”, the AV receiver will automatically enter standby mode if there is no operation for 30 minutes with no audio and no video signal input.

“**Auto Standby**” will appear on the AV receiver’s display and OSD 30 seconds before the Auto Standby comes on.

Note

- Set to “**On**”, the Auto Standby function may activate itself during playback with some sources.

UP-A1

■ UP-A1 ChargeMode

▶ Auto:

Power feeding is interrupted when your iPod/iPhone is fully charged.

▶ On:

Power feeding continues even if your iPod/iPhone is fully charged.

▶ Off:

Your iPod/iPhone is not charged.

You can specify how the power is fed to your iPod/iPhone when the AV receiver is in Standby Mode.

Note

- This setting cannot be selected when:
 - The UP-A1 Dock with docked iPod/iPhone is not connected to the AV receiver, or
 - The docked iPod/iPhone model is not supported.
- When the “**UP-A1 ChargeMode**” setting is set to “**On**”, or to “**Auto**” with your iPod/iPhone recharging, the **SLEEP** indicator is dimly lit in standby mode. In such conditions, the power consumption of the AV receiver slightly increases. With “**Auto**”, when the iPod/iPhone becomes fully charged, the **SLEEP** indicator goes off and the power consumption in standby mode is reduced.

HDMI Setup

Menu

HDMI Setup

HDMI Ctrl (RIHD)

- ▶ Off
- ▶ On

Turn this setting on to allow **RIHD**-compatible components connected via HDMI to be controlled by the AV receiver (→ [page 57](#)).

Note

- When the setting is set to “**On**” and the menu is closed, the names of connected **RIHD**-compatible components and “**RIHD On**” are displayed on the AV receiver.
- “**Search...**” → “**(name)**” → “**RIHD On**”
- When the AV receiver cannot receive the name of the component, it is displayed as “**Player****” or “**Recorder****”, etc (“******” shows up and indicates the number of components, when two or more are received).
- When an **RIHD**-compatible component is connected to the AV receiver via an HDMI cable, the name of the connected component is displayed on the AV receiver display. For example, while you are watching TV broadcasting, if you operate a Blu-ray Disc/DVD player (being powered on) with the remote control of the AV receiver, the name of the Blu-ray Disc/DVD player will be displayed on the AV receiver.
- Set it to “**Off**” when a connected piece of equipment is not compatible or it is unclear whether the equipment is compatible or not.
- If operation is not normal when set to “**On**”, change the setting to “**Off**”.
- Refer to the connected component’s instruction manual for details.
- When the “**HDMI Ctrl (RIHD)**” setting is set to “**On**”, the power consumption in standby mode slightly increases. (Depending on the TV status, the AV receiver will enter standby mode as usual.)

- When the source equipment is connected with the **RI** connection, it may malfunction if “**HDMI Ctrl (RIHD)**” is set to “**On**”.

HDMI Through

- ▶ Off
- ▶ BD/DVD, VCR/DVR, CBL/SAT, GAME, AUX, TV/CD, PORT:
- ▶ Last:

Selects the input source for which the HDMI Through function is enabled.

The HDMI Through function is activated on the input source selected at the time of setting the AV receiver to standby mode.

When enabling the HDMI Through function, regardless of whether the AV receiver is on or in standby, both audio and video streams from an HDMI input will be output to the TV or other components via HDMI connection. In standby mode, the **HDMI THRU** and **HDMI** indicators will light (**HDMI** will be dimly-lit).

This setting is fixed to “**Auto**” automatically when the above “**HDMI Ctrl (RIHD)**” setting is set to “**On**”, resulting in automatic input source selection.

Note

- Only the input source assigned to the **HDMI IN** via “**HDMI Input**” is enabled (→ [page 34](#)).
- The power consumption in standby mode will increase during the HDMI Through function; however in the following cases, the power consumption can be saved:
 - The TV is in standby mode.
 - You are watching a TV program.
- Refer to the connected component’s instruction manual for details.
- Depending on the connected component, the correct input source may not be selected with the setting fixed to “**Auto**”.
- This setting is set to “**Off**” automatically when the “**HDMI Ctrl (RIHD)**” setting is set to “**Off**”.

Audio TV Out

- ▶ Off
- ▶ On

This preference determines whether the incoming audio signal is output from the HDMI output. You may want to turn this preference on if your TV is connected to the HDMI output and you want to listen to the audio from a connected component through your TV’s speakers. Normally, this should be set to “**Off**”.

Note

- If “**On**” is selected and the audio can be output from the TV, the AV receiver will output no sound through its speakers. In this case, “**TV Speaker**” appears on the AV receiver’s display by pressing **DISPLAY**.
- When “**HDMI Ctrl (RIHD)**” is set to “**On**”, this setting is fixed to “**Auto**”.
- With some TVs and input signals, no sound may be output even when this setting is set to “**On**”.
- When “**Audio TV Out**” or “**HDMI Ctrl (RIHD)**” is set to “**On**” and you’re listening through your TV’s speakers (→ [page 14](#)), turning up the AV receiver’s volume control will make the sound be output from the AV receiver’s front left and right speakers. To stop the AV receiver’s speakers producing sound, change the settings, change your TV’s settings, or turn down the AV receiver’s volume.
- Listening mode cannot be changed when this setting is set to “**On**” and the input source is not HDMI.

■ Audio Return Ch (ARC)

▶ Off

▶ Auto:

The audio signal from your TV tuner can be sent to the **HDMI OUT** of the AV receiver.

The audio return channel (ARC) function allows an ARC capable TV to send the audio stream to the **HDMI OUT** of the AV receiver. To use this function, you must select the **TV/CD** input selector and your TV must be ARC capable.

Note

- This setting is fixed to “- - -” when the “**HDMI Ctrl (RIHD)**” setting is set to “**Off**”.
- This setting is set to “**Auto**” automatically when the “**HDMI Ctrl (RIHD)**” setting is set to “**On**” for the first time.
- If you set “**Audio Return Ch**” to “**Auto**”, the “**Audio Selector**” settings of the **TV/CD** input selector will be automatically switched to “**ARC**” (→ [page 39](#)).

■ LipSync

▶ Off

▶ On

This function allows the AV receiver to automatically correct any delay between the video and the audio, based on the data from the connected monitor.

Note

- This function works only if your HDMI-compatible TV supports HDMI Lip Sync.

After changing the settings of the “**HDMI Ctrl (RIHD)**”, “**HDMI Through**” or “**Audio Return Ch**” turn off the power on all connected pieces of equipment and then turn them on again. Refer to the user’s manuals for all connected pieces of equipment.

Using the Audio Settings

You can change various audio settings from the Home menu (→ [page 28](#)).

- 1 Press **RECEIVER** followed by **AUDIO**.
- 2 Use **▲/▼** and **ENTER** to select “**Audio**”, and then use **▲/▼/◀/▶** to make the desired selection.

Note

- These settings are not available in either of the following cases:
 - The “**Audio TV Out**” setting is set to “**On**” (→ [page 41](#)).
 - “**HDMI Ctrl (RIHD)**” is set to “**On**” (→ [page 41](#)) and you’re listening through your TV speakers.

Tone Control

■ Bass

▶ **-10 dB** to **0 dB** to **+10 dB** in 2 dB steps

You can boost or cut low-frequency sounds output from the front speakers.

■ Treble

▶ **-10 dB** to **0 dB** to **+10 dB** in 2 dB steps

You can boost or cut high-frequency sounds output from the front speakers.

You can adjust the bass and treble for Speakers A and B front speakers, except when the Direct listening mode is selected.

Operating on the remote controller directly

- 1 Press **RECEIVER** once followed by **TONE** repeatedly to select either “**Bass**” or “**Treble**”.
- 2 Use **-** and **+** to adjust.

Tip

- Alternatively, you can use the AV receiver’s **TONE** and **-/+**.

Speaker Levels

■ Subwoofer Level

▶ **-15 dB** to **+3 dB** to **+12 dB** in 1 dB steps

■ Center Level

▶ **-12 dB** to **0 dB** to **+12 dB** in 1 dB steps

You can adjust the volume of each speaker while listening to an input source.

These temporary adjustments are cancelled when the AV receiver is set to standby. To save the setting you made here, go to “**Level Cal (Level Calibration)**” (→ [page 37](#)) before setting the AV receiver to standby.

Note

- These settings cannot be calibrated in either of the following cases:
 - A pair of headphones is connected.
 - The AV receiver is muted.
- Speakers that are set to “**No**” or “**None**” in the “**Sp Config (Speaker Configuration)**” (→ [page 35](#)) cannot be adjusted.

EX.BASS

■ EX.BASS

▶ Off

▶ On

EX.BASS is a technology that have developed by experiments and listening tests to reproduce a natural deeper bass. When you turn the mode on, you can get dynamic and deeper presence on your movies and music.

Note

- This setting is not available in either of the following cases:
 - A pair of headphones is connected.
 - Speakers B is on.
 - Speakers A is off.
 - Direct listening mode is selected.
 - The “**Subwoofer**” setting is set to “**No**” (→ [page 35](#)).

Late Night

■ Late Night

For **Dolby Digital** and **Dolby Digital Plus** sources, the options are:

- ▶ **Off**
- ▶ **Low:**
Small reduction in dynamic range.
- ▶ **High:**
Large reduction in dynamic range.

For **Dolby TrueHD** sources, the options are:

- ▶ **Auto:**
The Late Night function is set to “**On**” or “**Off**” automatically.
- ▶ **Off**
- ▶ **On**

Turn this setting on to reduce the dynamic range of Dolby Digital material so that you can still hear quiet parts even when listening at low volume levels—ideal for watching movies late at night when you don’t want to disturb anyone.

Note

- The effect of the Late Night function depends on the material that you are playing and the intention of the original sound designer, and with some material there will be little or no effect when you select the different options.
- The Late Night function can be used only when the input source is Dolby Digital, Dolby Digital Plus, or Dolby TrueHD.
- The Late Night function is set to “**Off**” when the AV receiver is set to standby. For Dolby TrueHD sources, it will be set to “**Auto**”.

Music Optimizer

■ Music Optimizer

- ▶ **Off**
- ▶ **On**

The Music Optimizer function enhances the sound quality of compressed music files. The **M.Opt** indicator lights on the AV receiver’s display.

Tip

- Alternatively, you can use the AV receiver’s **MUSIC OPTIMIZER**.

Note

- The Music Optimizer function only works with PCM digital audio input signals with a sampling rate below 48 kHz and analog audio input signals.
- The Music Optimizer is disabled when the Direct listening mode is selected.
- The setting is stored individually for each input selector.

CinemaFILTER

■ Cinema Filter

- ▶ **Off**
- ▶ **On**

Turn this setting on to soften overly bright movie soundtracks, which are typically mixed for reproduction in a movie theater.

CinemaFILTER can be used with the following listening modes: Dolby Digital, Dolby Digital Plus, Dolby TrueHD, Dolby Pro Logic II Movie, Multichannel, DTS, DTS Neo:6 Cinema, DTS 96/24, DTS-HD High Resolution Audio, DTS-HD Master Audio and DTS Express.

Note

- The CinemaFILTER may not work when used with certain input sources.

iPod/iPhone Playback via Onkyo Dock

Using the Onkyo Dock

The Dock is sold separately. Models sold are different depending on the region.

For the latest information on the Onkyo Dock components, see the Onkyo web site at: <http://www.onkyo.com>

Before using the Onkyo Dock components, update your iPod/iPhone with the latest software, available from the Apple web site.

For supported iPod/iPhone models, see the instruction manual of the Onkyo Dock.

UP-A1 Dock

With the UP-A1 Dock, you can easily play the music, photo, or movie stored on your Apple iPod/iPhone through the AV receiver and enjoy great sound.

You can use the AV receiver's remote controller to operate your iPod/iPhone.

■ System Function

The AV receiver may take several seconds to startup, so you might not hear the first few seconds of the first song.

Auto Power On

If you start iPod/iPhone playback while the AV receiver is in Standby, the AV receiver will automatically turn on and select your iPod/iPhone as the input source.

Direct Change

If you start iPod/iPhone playback while listening to another input source, the AV receiver will automatically select your iPod/iPhone as the input source.

Using the AV receiver's Remote Controller

You can use the AV receiver's remote controller to control basic iPod/iPhone functions (→ [page 45](#)).

■ Operating Notes

- Functionality depends on your iPod/iPhone model and generation.
- Before selecting a different input source, stop iPod/iPhone playback to prevent the AV receiver from selecting the iPod/iPhone input source by mistake.
- If any accessories are connected to your iPod/iPhone, the AV receiver may not be able to select the input source properly.
- When connecting UP-A1 Dock to the radio tuner UP-DT1 with AUTO selected by the tuner's Mode Selector switch, you can switch the input source between UP-A1 Dock and the tuner, by pressing **PORT** repeatedly on the front panel.
- While your iPod/iPhone is in the UP-A1 Dock, its volume control has no effect. If you adjust your iPod/iPhone models volume control while it's in the UP-A1 Dock, make sure it's not set too high before you reconnect your headphones.
- The Auto Power On function will not work if you set your iPod/iPhone in the UP-A1 Dock while it is playing.
- Do not turn off the power with the iPod/iPhone still connected to this unit via the UP-A1 Dock.
- Set your iPod/iPhone in the UP-A1 Dock after the AV receiver turns on.
- "UP-A1 ChargeMode" must be set to "On" to enable the Auto Power On and Direct Change functions (→ [page 40](#)).

■ Using Your iPod/iPhone models Alarm Clock

You can use your iPod/iPhone models Alarm Clock function to automatically turn on your iPod/iPhone and the AV receiver at a specified time. The AV receiver's input source will automatically be set to the **PORT** selector.

Note

- To use this function, your iPod/iPhone must be in the UP-A1 Dock, and the UP-A1 Dock must be connected to the AV receiver.
- This function works only in the Standard mode (→ [page 46](#)).
- When you use this function, be sure to set the AV receiver's volume control to a suitable level.

- You cannot use this function for sound effects on your iPod/iPhone.
- "UP-A1 ChargeMode" must be set to "On" to enable the Alarm Clock (→ [page 40](#)).

■ Charging Your iPod/iPhone models Battery

The UP-A1 Dock charges your iPod/iPhone models battery while your iPod/iPhone is in the UP-A1 Dock connected to the AV receiver. While your iPod/iPhone is seated in the UP-A1 Dock, its battery will be charged when the AV receiver is set to on or standby.

You can specify how the power is fed to your iPod/iPhone when the AV receiver is in standby mode (→ [page 40](#)).

Note

- When UP-A1 Dock that seated iPod/iPhone is connected, the power consumption in standby mode slightly increases.

■ Status Messages

If either of the following message is not displayed on the AV receiver's display, check the connection to your iPod/iPhone.

• PORT Reading

The AV receiver is checking the connection with the dock.

• PORT Not Support

The AV receiver do not support the connected dock.

• PORT UP-A1

UP-A1 Dock is connected.

Note

- The AV receiver displays the message "UP-A1" for several seconds after recognizing the UP-A1.

RI Dock

With the RI Dock, you can easily play the music stored on your Apple iPod/iPhone through the AV receiver and enjoy great sound, and watch iPod/iPhone slideshows and videos on your TV. In addition, the on-screen display (OSD) allows you to view, navigate, and select your iPod/iPhone model's contents on your TV, and with the supplied remote controller, you can control your iPod/iPhone from the comfort of your sofa. You can even use the AV receiver's remote controller to operate your iPod/iPhone.

Note

- Enter the appropriate remote control code before using the AV receiver's remote controller for the first time (→ [page 47](#)).
- Connect the RI Dock to the AV receiver with an **RI** cable (→ [page 16](#)).
- Set the RI Dock's RI MODE switch to "HDD" or "HDD/DOCK".
- Set the AV receiver's Input Display to "DOCK" (→ [page 30](#)).

■ System Function

System On

When you turn on the AV receiver, the RI Dock and iPod/iPhone turn on automatically. In addition, when RI Dock and iPod/iPhone are on, the AV receiver can be turned on by pressing **I/⏻ ON/STANDBY**.

Auto Power On

If you press the remote controller's **▶** (Playback) while the AV receiver is on standby, the AV receiver will automatically turn on, select your iPod/iPhone as the input source, and your iPod/iPhone will start playback.

Direct Change

If you start iPod/iPhone playback while listening to another input source, the AV receiver will automatically switch to the input to which RI Dock is connected.

Other Remote Operations

You can use the remote controller that came with the AV receiver to control other iPod/iPhone functions. The available functionality depends on the AV receiver.

iPod/iPhone Alarm

If you use the Alarm function on your iPod/iPhone to start playback, the AV receiver will turn on at the specified time and select your iPod/iPhone as the input source automatically.

Note

- Linked operations do not work with video playback or when the alarm is set to play a sound.
- If you use your iPod/iPhone with any other accessories, iPod/iPhone playback detection may not work.
- The System On function may not work depending on the RI Dock.

■ Operating Notes

- Use the AV receiver's volume control to adjust the playback volume.
- While your iPod/iPhone is inserted in the RI Dock, its volume control has no effect.
- If you do adjust the volume control on your iPod/iPhone while it's inserted in the RI Dock, be careful that it's not set too loud before you reconnect your headphones.

Controlling Your iPod/iPhone

By pressing the **REMOTE MODE** button that's been programmed with the remote control code for your Dock, you can control your iPod/iPhone in the Dock with the buttons described further in this section.

See "Entering Remote Control Codes" for details on entering a remote control code (→ [page 47](#)).

See the Dock's instruction manual for more information.

UP-A1 Dock

PORT is preprogrammed with the remote control code for controlling a Dock with Universal Port connector.

You can control your iPod/iPhone when "PORT" is selected as the input source.

RI Dock

- Set the RI Dock's RI MODE switch to "HDD" or "HDD/DOCK".
- **I/⏻ ON/STANDBY** may not work with a remote control code (without **RI**). In this case, make an **RI** connection and enter the remote control code **81993** (with **RI**).

■ With the RI Control

Make an **RI** connection and enter the remote control code **81993** (with **RI**).

- Set the AV receiver's Input Display to "DOCK" (→ [page 30](#)).

■ Without the RI Control

You must enter the remote control code **82990** first (→ [page 48](#)).

■ UP-A1 Dock operation

Available buttons	
③ ▲/▼/◀/▶*3, ENTER	⑦ MUTING
PLAYLIST ◀/▶*4	⑧ ALBUM +/-*4
④ ▶, II, ■, ◀◀, ▶▶, ◀◀◀, ▶▶▶	⑨ VOL ▲/▼
⑤ REPEAT	⑪ RETURN
RANDOM	⑫ PLAY MODE*7
⑥ DISPLAY*5	

■ RI Dock operation

Available buttons	
① I/O ON/STANDBY*1	⑥ DISPLAY*6
② TOP MENU*2	⑦ MUTING
③ ▲/▼/◀/▶, ENTER	⑧ ALBUM +/-
④ ▶, II, ■, ◀◀, ▶▶, ◀◀◀, ▶▶▶	⑨ VOL ▲/▼
⑤ REPEAT	⑩ MENU
RANDOM	⑫ PLAY MODE*8

Note

- With some iPod/iPhone models, generations and RI Docks, certain buttons may not work as expected.
 - For detailed operation of iPod/iPhone, please refer to the instruction manual of the RI Dock.
- *1 This button does not turn the Onkyo DS-A2 or DS-A2X RI Dock on or off. Also, your iPod/iPhone may not respond the first time you press this button, in which case you should press it again. This is because the remote controller transmits the On and Standby commands alternately, so if your iPod/iPhone is already on, it will remain on when the remote controller transmits the On command. Similarly, if your iPod/iPhone is already off, it will remain off when the remote controller transmits the Off command.
- *2 **TOP MENU** works as the mode button when used with the DS-A2 RI Dock.

*3 In Extended mode (see *7), ◀/▶ is used as the page jump button.

This allows you to quickly locate your favorite songs even when such lists as the song or artist lists are very long.

*4 In Extended mode (see *7), this button doesn't work.

*5 In Extended mode (see *7), **DISPLAY** is used to switch between song informations. In Standard mode (see *7), **DISPLAY** turns on backlight for a second.

*6 **DISPLAY** turns on backlight for a second.

*7 Press **PLAY MODE** to change the following modes:

Standard mode

Nothing is displayed on your TV. Contents are browsed and selected on your iPod/iPhone display.

Only this mode can playback the video.

Extended mode

Playlists (artists, albums, songs, and so on) are displayed on your TV, and you can navigate and select your music while looking at your TV.

*8 Resume mode

With the Resume function, you can resume playback of the song that was playing when you removed your iPod/iPhone from the RI Dock.

Note

- In Extended mode (see *7), you cannot operate your iPod/iPhone directly.
- In Extended mode (see *7), it may take some time to acquire the contents.
- In Extended mode (see *7), video contents can not display on your TV.
- In Extended mode (see *7), the on-screen navigation menus appear only on a TV that is connected to the HDMI output.

Controlling Other Onkyo Components

You can use the AV receiver's remote controller to control your other Onkyo AV components. This section explains how to enter the remote control code for a component that you want to control: DVD, CD, etc.

Preprogrammed Remote Control Codes

The following **REMOTE MODE** buttons are preprogrammed with remote control codes for controlling the components listed. You do not need to enter a remote control code to control these components.

For details on controlling these components, see the indicated pages.

- BD/DVD** Onkyo Blu-ray Disc player (→ [page 49](#))
TV/CD Onkyo CD player (→ [page 50](#))
PORT Onkyo Universal Port Option (→ [page 45](#))

Entering Remote Control Codes

You'll need to enter a code for each component that you want to control.

- 1 Look up the appropriate remote control code in the Remote Control Codes for Onkyo Components Connected via RI.**
- 2 While holding down the REMOTE MODE button to which you want to assign a code, press and hold down DISPLAY (about 3 seconds).**

The remote indicator lights.

Note

- Remote control codes cannot be entered for **RECEIVER**.
- Except for **RECEIVER** remote control codes from any category can be assigned to the **REMOTE MODE** button. However, these buttons also work as input selector buttons (→ [page 19](#)), so choose a **REMOTE MODE** button that corresponds with the input to which you connect your component. For example, if you connect your CD player to the CD input, choose **TV/CD** when entering its remote control code.

- 3 Within 30 seconds, use the number buttons to enter the 5-digit remote control code.**

The remote indicator flashes twice.

If the remote control code is not entered successfully, the remote indicator will flash once slowly.

Remote Control Codes for Onkyo Components Connected via RI

Onkyo components that are connected via **RI** are controlled by pointing the remote controller at the AV receiver, not the component. This allows you to control components that are out of view, in a rack, for example.

- 1 Make sure the Onkyo component is connected with an RI cable and an analog audio cable (RCA).**
See "Connecting Onkyo **RI** Components" for details (→ [page 16](#)).
- 2 Enter the appropriate remote control code for a REMOTE MODE button, by referring to the previous section.**
 - ▶ **42157:**
Onkyo cassette tape deck with **RI**
 - ▶ **81993:**
Onkyo Dock with **RI**
- 3 Press the REMOTE MODE button, point the remote controller at the AV receiver, and operate the component.**

↳ To be continued

Controlling Onkyo components without **RI**

If you want to control an Onkyo component by pointing the remote controller directly at it, or you want to control an Onkyo component that's not connected via **RI**, use the following remote control codes:

- ▶ **30627:**
Onkyo DVD player without **RI**
- ▶ **71817:**
Onkyo CD player without **RI**
- ▶ **32900:**
Onkyo Blu-ray Disc player
- ▶ **32901:**
Onkyo HD DVD player
- ▶ **70868:**
Onkyo MD recorder without **RI**
- ▶ **71323:**
Onkyo CD recorder without **RI**
- ▶ **82990:**
Onkyo Dock without **RI**

Resetting the REMOTE MODE Buttons

You can reset a **REMOTE MODE** button to its default remote control code.

- 1** While holding down the **REMOTE MODE** button that you want to reset, press and hold down **AUDIO** until the remote indicator lights (about 3 seconds).
- 2** Within 30 seconds, press the **REMOTE MODE** button again.

The remote indicator flashes twice, indicating that the button has been reset.

Each **REMOTE MODE** button is preprogrammed with a remote control code. When a button is reset, its preprogrammed code is restored.

Resetting the Remote Controller

You can reset the remote controller to its default settings.

- 1** While holding down **RECEIVER**, press and hold down **AUDIO** until the remote indicator lights (about 3 seconds).
- 2** Within 30 seconds, press **RECEIVER** again.
The remote indicator flashes twice, indicating that the remote controller has been reset.

Controlling Other Components

By pressing the **REMOTE MODE** button that's been programmed with the remote control code for your component, you can control Onkyo component as described below.

For details on entering a remote control code for other components, see "Entering Remote Control Codes" (→ [page 47](#)).

Controlling a Blu-ray Disc/DVD Player, HD DVD Player

BD/DVD is preprogrammed with the remote control code for controlling a component that supports the **RIHD**^{*1} (limited to some models). The component must be able to receive remote control commands via **RIHD** and be connected to the AV receiver via HDMI.

Use the following remote control codes:

▶ **32910/31612:**

Blu-ray Disc/DVD player with **RIHD**

*1 The **RIHD** supported by the AV receiver is the CEC system control function of the HDMI standard.

Blu-ray Disc player / HD-DVD player operation

Available buttons

①	/⏻ ON/STANDBY	⑦	Number: 1 to 9, 0
②	TOP MENU		Number: +10 ^{*1}
③	▲/▼/◀/▶, ENTER	⑧	DISPLAY
④	SETUP	⑨	MUTING
⑤	▶, II, ■, ◀, ▶▶, ◀◀, ▶▶▶	⑩	DISC +/-
		⑪	MENU
⑥	Red (A)	⑫	RETURN
	Green (B)	⑬	AUDIO ^{*1}
	Yellow (C)	⑭	CLR
	Blue (D)		

DVD player operation

Available buttons

①	/⏻ ON/STANDBY	⑦	Number: 1 to 9, 0
②	TOP MENU		Number: +10 ^{*1}
③	▲/▼/◀/▶, ENTER	⑧	DISPLAY
④	SETUP	⑨	MUTING
⑤	▶, II, ■, ◀, ▶▶, ◀◀, ▶▶▶	⑩	DISC +/-
		⑪	MENU
⑥	SEARCH ^{*1}	⑫	RETURN
	REPEAT	⑬	AUDIO ^{*1}
	RANDOM ^{*1}	⑭	CLR
	PLAY MODE ^{*1}		

Press the appropriate **REMOTE MODE** button first.

■ CD player / CD recorder / MD recorder operation

Available buttons

①	I/⏻ ON/STANDBY	⑦	Number: 1 to 9, 0
③	▲/▼/◀/▶, ENTER		Number: +10
④	SETUP	⑧	DISPLAY
⑤	▶, ■, ■, ◀, ▶, ◀, ▶	⑨	MUTING
⑥	SEARCH	⑩	DISC +/-
	REPEAT	⑭	CLR
	RANDOM		
	PLAY MODE		

■ Cassette tape deck operation

Available buttons

①	I/⏻ ON/STANDBY	⑨	MUTING
⑤	▶, ◀ (reverse playback), ■, ◀, ▶, ◀, ▶		

Note

- With some components, certain buttons may not work as expected, and some may not work at all.
- See “Controlling Your iPod/iPhone” about the operation of iPod/iPhone (→ [page 45](#)).
- *1 The **RIHD** function is not supported. The **RIHD** supported by the AV receiver is the CEC system control function of the HDMI standard.

Troubleshooting

If you have any trouble using the AV receiver, look for a solution in this section. If you can't resolve the issue yourself, contact your Onkyo dealer.

If you can't resolve the issue yourself, try resetting the AV receiver before contacting your Onkyo dealer.

To reset the AV receiver to its factory defaults, turn it on and, while holding down VCR/DVR, press ON/STANDBY. "Clear" will appear on the AV receiver's display and the AV receiver will enter standby mode.

Note that resetting the AV receiver will delete your radio presets and custom settings.

To reset the remote controller to its factory defaults, while holding down **RECEIVER**, press and hold down **AUDIO** until the remote indicator lights (about 3 seconds). Within 30 seconds, press **RECEIVER** again.

The on-screen menus appear only on a TV that is connected to the HDMI OUT. If your TV is connected to other video outputs, use the AV receiver's display when changing settings.

Power

Can't turn on the AV receiver

Make sure that the power cord is properly plugged into the wall outlet. —

Unplug the power cord from the wall outlet, wait five seconds or more, then plug it in again. —

The AV receiver turns off unexpectedly

The AV receiver will automatically enter standby mode when Auto Standby has been set and launches. **40**

The AV receiver turns off and after restoring the power, it turns off again

The protection circuit has been activated. Remove the power cord from the wall outlet immediately. Make sure that all speaker cables and input sources are properly connected, and leave the AV receiver with its power cord disconnected for 1 hour. After that, reconnect the power cord and turn the power on. If the AV receiver turns off again, unplug the power cord and contact your Onkyo dealer. **12**

Caution: If "CHECK SP WIRE" appears on the AV receiver's display, the speaker cables may be shorting.

WARNING

If smoke, smell or abnormal noise is produced by the AV receiver, unplug the power cord from the wall outlet immediately and contact your Onkyo dealer.

Audio

There's no sound, or it's very quiet

Press **SPEAKERS A** or **B** to turn on the speaker indicator that you want to output sound. **28**

Make sure that the digital input source is selected properly. **35**

Make sure that all audio connecting plugs are pushed in all the way. **13**

Make sure that the inputs and outputs of all components are connected properly. **14-16**

Make sure that the polarity of the speaker cables is correct, and that the bare wires are in contact with the metal part of each speaker terminal. **12**

Make sure that the input source is properly selected. **19**

Make sure that the speaker cables are not shorting. **12**

Check the volume. The AV receiver is designed for home theater enjoyment. It has a wide volume range, allowing precise adjustment. —

If the **MUTING** indicator is flashing on the AV receiver's display, press the remote controller's **MUTING** to unmute the AV receiver. **30**

While a pair of headphones is connected to the **PHONES** jack, no sound is output from the speakers. **31**

If there's no sound from a DVD player connected to an HDMI IN, check the DVD player's output settings, and be sure to select a supported audio format. —

Check the digital audio output setting on the connected device. On some game consoles, such as those that support DVD, the default setting is off. —

With some DVD-Video discs, you need to select an audio output format from a menu. —

If your turntable uses an MC cartridge, you must connect an MC head amp, or an MC transformer. —

Make sure that none of the connecting cables are bent, twisted, or damaged. —

Not all listening modes use all speakers. **24**

Specify the speaker distances and adjust the individual speaker levels. **36**

If the input signal format is set to “PCM” or “DTS”, set it to “Off”. **39**

■ Only the front speakers produce sound

When the Stereo or Mono listening mode is selected, only the front speakers and subwoofer produce sound. **26**

Check the Speaker Configuration. **35**

■ Only the center speaker produces sound

If you use the Dolby Pro Logic II Movie, Dolby Pro Logic II Music, or Dolby Pro Logic II Game listening mode with a mono source, such as an AM radio station or mono TV program, the sound is concentrated in the center speaker. —

Make sure the speakers are configured correctly. **35**

■ The surround speakers produce no sound

When the T-D (Theater-Dimensional), Stereo or Mono listening mode is selected, the surround speakers produce no sound. —

Depending on the source and current listening mode, not much sound may be produced by the surround speakers. Try selecting another listening mode. **23**

Make sure the speakers are configured correctly. **35**

■ The center speaker produces no sound

When the Stereo or Mono listening mode is selected, the center speaker produces no sound. —

Make sure the speakers are configured correctly. **35**

■ The subwoofer produces no sound

The subwoofer outputs no sound while only Speakers B is on. Turn on Speakers A. **28**

When you play source material that contains no information in the LFE channel, the subwoofer produces no sound. —

Make sure the speakers are configured correctly. **35**

■ There’s no sound with a certain signal format

Check the digital audio output setting on the connected device. On some game consoles, such as those that support DVD, the default setting is off. —

With some DVD-Video discs, you need to select an audio output format from a menu. —

Depending on the input signal, some listening modes cannot be selected. **24-25**

■ Can’t get 5.1 playback

When Speaker B is turned on, Speakers A is reduced to 2.1-channel playback. **28**

Depending on the number of connected speakers, it is not always possible to select all of the listening modes. **24-25**

■ The speaker volume cannot be set as required

After the volume level of each individual speaker has been adjusted, the maximum volume may be reduced. **37**

■ Noise can be heard

Using cable ties to bundle audio cables with power cords, speaker cables, and the like may degrade the audio performance, so refrain from doing it. —

An audio cable may be picking up interference. Try repositioning your cables. —

■ The Late Night function doesn’t work

Make sure the source material is Dolby Digital, Dolby Digital Plus, or Dolby TrueHD. **43**

■ About DTS signals

When DTS program material ends and the DTS bitstream stops, the AV receiver remains in DTS listening mode and the **dts** indicator remains on. This is to prevent noise when you use the pause, fast forward, or fast reverse function on your player. If you switch your player from DTS to PCM, because the AV receiver does not switch formats immediately, you may not hear any sound, in which case you should stop your player for about three seconds, and then resume playback. —

With some CD and LD players, you won’t be able to playback DTS material properly even though your player is connected to a digital input on the AV receiver. This is usually because the DTS bitstream has been processed (e.g., output level, sampling rate, or frequency response changed) and the AV receiver doesn’t recognize it as a genuine DTS signal. In such cases, you may hear noise. —

Playing DTS program material, using the pause, fast forward, or fast reverse function on your player may produce a short audible noise. This is not a malfunction. —

■ The beginning of audio received by an HDMI IN can’t be heard

Since it takes longer to identify the format of an HDMI signal than it does for other digital audio signals, audio output may not start immediately. —

Video

■ There's no picture

Make sure that all video connecting plugs are pushed in all the way. **13**

Make sure that each video component is properly connected. **14, 16**

If the video source is connected to a component video input, you must assign that input to an input selector, and your TV must be connected to **COMPONENT VIDEO OUT**. **15, 34**

If the video source is connected to a composite video input, your TV must be connected to the corresponding composite video output. **15**

If the video source is connected to an HDMI input, you must assign that input to an input selector, and your TV must be connected to the **HDMI OUT**. **14, 34**

On your TV, make sure that the video input to which the AV receiver is connected is selected. —

■ There's no picture from a source connected to an HDMI IN

Reliable operation with an HDMI-to-DVI adapter is not guaranteed. In addition, video signals from a PC are not guaranteed. **59**

■ The on-screen menus don't appear

On your TV, make sure that the video input to which the AV receiver is connected is selected. —

When the AV receiver is not connected to a TV via **HDMI OUT**, on-screen menus are not displayed. —

Tuner

■ Reception is noisy, FM stereo reception is noisy, or the FM STEREO indicator doesn't light

Relocate your antenna. —

Move the AV receiver away from your TV or computer. —

Listen to the station in mono. **20**

When listening to an AM station, operating the remote controller may cause noise. —

Passing cars and airplanes can cause interference. —

Concrete walls weaken radio signals. —

If nothing improves the reception, install an outdoor antenna. —

Remote Controller

■ The remote controller doesn't work

Before operating this unit, be sure to press **RECEIVER**. —

Make sure that the batteries are installed with the correct polarity. **4**

Install new batteries. Don't mix different types of batteries, or old and new batteries. **4**

Make sure that the remote controller is not too far away from the AV receiver, and that there's no obstruction between the remote controller and the AV receiver's remote control sensor. **4**

Make sure that the AV receiver is not subjected to direct sunshine or inverter-type fluorescent lights. Relocate if necessary. —

If the AV receiver is installed in a rack or cabinet with colored-glass doors, the remote controller may not work reliably when the doors are closed. —

Make sure you've selected the correct remote controller mode. **10, 47**

Make sure you've entered the correct remote control code. **47**

Make sure to set the same ID on both the AV receiver and remote controller. **39**

■ Can't control other components

If it's an Onkyo component, make sure that the **RI** cable and analog audio cable are connected properly. Connecting only an **RI** cable won't be enough. **16**

Make sure you've selected the correct remote controller mode. **10, 49**

For a proper operation of the remote controller as a cassette tape deck is connected to the **TV/CD IN** jack, or as an **RI Dock** is connected to the **TV/CD IN**, **VCR/DVR IN** or **GAME IN** jacks, you must set the input display accordingly. **30**

If you cannot operate it, you will need to enter the appropriate remote control code. **47**

To control an Onkyo component that's connected via **RI**, point the remote controller at the AV receiver. Be sure to enter the appropriate remote control code first. **47**

To control an Onkyo component that's not connected via **RI**, point the remote controller at the component. Be sure to enter the appropriate remote control code first. **48**

UP-A1 Dock for iPod/iPhone

■ There's no sound

Make sure your iPod/iPhone is actually playing. —

Make sure your iPod/iPhone is properly inserted in the Dock. —

Make sure the UP-A1 Dock is connected to the **UNIVERSAL PORT** jack on the AV receiver. —

Make sure the AV receiver is turned on, the correct input source is selected, and the volume is turned up. —

Make sure the plugs are pushed in all the way. —

Try resetting your iPod/iPhone. —

■ There's no video

Make sure that your iPod/iPhone model's TV OUT setting is set to On. —

Make sure the correct input is selected on your TV or the AV receiver. —

Some versions of the iPod/iPhone do not output video. —

■ The AV receiver's remote controller doesn't control my iPod/iPhone

Make sure your iPod/iPhone is properly inserted in the Dock. If your iPod/iPhone is in a case, it may not connect properly to the Dock. Always remove your iPod/iPhone from the case before inserting it into the Dock. —

The iPod/iPhone cannot be operated while it's displaying the Apple logo. —

Make sure you've selected the right remote mode. **45** —

When you use the AV receiver's remote controller, point it toward your AV receiver. —

When connecting UP-A1 Dock to the radio tuner UP-DT1 with AUTO selected by the tuner's Mode Selector switch, you can switch the input source between UP-A1 Dock and the tuner, by pressing **PORT** repeatedly on the front panel. —

If you still can't control your iPod/iPhone, start playback by pressing your iPod/iPhone model's Play button. Remote operation should then be possible. —

Try resetting your iPod/iPhone. —

Depending on your iPod/iPhone, some buttons may not work as expected. —

■ The AV receiver unexpectedly selects my iPod/iPhone as the input source

Always pause iPod/iPhone playback before selecting a different input source. If playback is not paused, the Direct Change function may select your iPod/iPhone as the input source by mistake during the transition between tracks. —

■ iPod/iPhone doesn't work properly

Try reconnecting your iPod/iPhone. —

Recording

■ Can't record

On your recorder, make sure the correct input is selected. —

To prevent signal loops and damage to the AV receiver, input signals are not fed through to outputs with the same name (e.g., **VCR/DVR IN** to **VCR/DVR OUT**). —

Others

■ Standby power consumption

In the following cases, the power consumption in standby mode may reach up to a maximum of 31 W: **15, 41**

- You are using the Universal Port jack.
- “**HDMI Ctrl (RIHD)**” setting is set to “**On**”.
(Depending on the TV status, the AV receiver will enter standby mode as usual.)
- The “**HDMI Through**” setting is set to other than “**Off**”.

■ The sound changes when I connect my headphones

When a pair of headphones is connected, the listening mode is set to Stereo, unless it's already set to Stereo, Mono, or Direct. —

■ How do I change the language of a multiplex source

Use the “**Input Ch (Mux)**” setting on the “**Audio Adjust**” menu to select “**Main**” or “**Sub**”. **37**

■ The RI functions don't work

To use **RI**, you must make an **RI** connection and an analog audio connection (RCA) between the component and AV receiver, even if they are connected digitally. **16**

■ The following settings can be made for the composite video inputs

You must use the buttons on the unit to make these settings.

On the AV receiver, press the input selector for the input source that you want to set and the **SETUP** button simultaneously. While holding down the input selector button, press **SETUP** until “**Video ATT :On**” appears on the AV receiver's display. Then, release both buttons. To turn the setting off, repeat the above process so that “**Video ATT :Off**” appears on the AV receiver's display, and release the buttons.

• Video Attenuation

This setting can be made for the **BD/DVD**, **VCR/DVR**, **CBL/SAT**, **GAME**, or **AUX** input.

If you have a games console connected to the composite video input, and the picture isn't very clear, you can attenuate the gain.

Video ATT :Off: (default).

Video ATT :On: Gain is reduced by 2 dB.

■ If the picture on your TV/monitor connected to the HDMI OUT is unstable, try switching the DeepColor function off

To turn off the DeepColor function, simultaneously press the **CBL/SAT** and **ON/STANDBY** buttons on the AV receiver. While holding down **CBL/SAT**, press **ON/STANDBY** until “**Deep Color: Off**” appears on the AV receiver's display. Then, release both buttons. To reactivate the DeepColor function, repeat the above process until “**Deep Color: On**” appears on the AV receiver's display and release the buttons.

The AV receiver contains a microcomputer for signal processing and control functions. In very rare situations, severe interference, noise from an external source, or static electricity may cause it to lockup. In the unlikely event that this happens, unplug the power cord from the wall outlet, wait at least five seconds, and then plug it back in.

Onkyo is not responsible for damages (such as CD rental fees) due to unsuccessful recordings caused by the unit's malfunction. Before you record important data, make sure that the material will be recorded correctly.

Before disconnecting the power cord from the wall outlet, set the AV receiver to standby.

Connection Tips and Video Signal Path

The AV receiver supports several connection formats for compatibility with a wide range of AV equipment. The format you choose will depend on the formats supported by your components. Use the following sections as a guide.

The on-screen menus appear only on a TV that is connected to the HDMI OUT. If your TV is connected to other video outputs, use the AV receiver's display when changing settings.

Note

- The on-screen setup menus are displayed when:
 - There is no video input, or
 - The video input is 480p, 576p, 720p, 1080i, or 1080p.

Video Connection Formats

Video components can be connected by using any one of the following video connection formats: composite video, component video, or HDMI, the latter offering the best picture quality.

When choosing a connection format, bear in mind that the AV receiver doesn't convert between formats, so only outputs of the same format as the input will output the signal.

Audio Connection Formats

Audio components can be connected by using any of the following audio connection formats: analog, optical, coaxial, or HDMI.

When choosing a connection format, bear in mind that the AV receiver does not convert digital input signals for analog line outputs and vice versa. For example, audio signals connected to an optical or coaxial digital input are not output by the analog **VCR/DVR OUT**.

If signals are present at more than one input, the inputs will be selected automatically in the following order of priority: HDMI, digital, analog.

*1 Depends on the "Audio TV Out" setting (→ page 41).

*2 This is possible, when "Audio Return Ch" is set to "Auto" (→ page 42), the TV/CD input selector is selected, and your TV is ARC capable.

Tip

- When a signal is input via HDMI and the corresponding input selector is selected, the **HDMI** indicator lights.

Using an RIHD-compatible TV, Player, or Recorder

RIHD, which stands for Remote Interactive over HDMI, is the name of the system control function found on Onkyo components. The AV receiver can be used with CEC (Consumer Electronics Control), which allows system control over HDMI and is part of the HDMI standard. CEC provides interoperability between various components, however, operation with components other than **RIHD**-compatible components cannot be guaranteed.

About RIHD-compatible components

The following components are **RIHD**-compatible (As of January 2012).

■ TV

- Toshiba TV
- Sharp TV

■ Players/Recorders

- Onkyo and Integra **RIHD**-compatible players
- Toshiba players and recorders (only when used together with Toshiba TV)
- Sharp players and recorders (only when used together with Sharp TV)

* Models other than those mentioned above may have some interoperability if compatible with CEC which is part of the HDMI Standard, but operation cannot be guaranteed.

Note

- For proper linked operations, do not connect more **RIHD**-compatible components than the quantities specified below, to the HDMI input terminal.
 - Blu-ray Disc/DVD players: up to three.
 - Blu-ray Disc/DVD recorders/Digital Video Recorders: up to three.
 - Cable/Satellite Set-top boxes: up to four.
- Do not connect the AV receiver to the other AV receiver/AV amplifier via HDMI.
- Proper linked operations are not guaranteed when more **RIHD**-compatible components than the above-mentioned quantities are connected.

Operations that can be performed with RIHD connection

■ For RIHD-compatible TV

The following linked operations are enabled by connecting the AV receiver to an **RIHD**-compatible TV.

- The AV receiver will enter standby mode when the power of the TV is turned to standby.
- You can set on the menu screen of the TV to either output the audio from the speakers connected to the AV receiver, or from the speakers of the TV.
- It is possible to output the video/audio coming from the antenna or from the input jack of the TV from the speakers connected to the AV receiver. (A connection such as optical digital cable or similar is required above the HDMI cable.)
- Input to the AV receiver can be selected with the remote controller of the TV.
- Operations such as volume adjustment or similar for the AV receiver can be performed from the remote controller of the TV.

■ For RIHD-compatible players/recorders

The following linked operations are enabled by connecting the AV receiver to an **RIHD**-compatible player/recorder.

- When the playback is started on the player/recorder, input of the AV receiver will switch to the HDMI input of the player/recorder that is playing back.
- Operation of the player/recorder is possible using the remote controller supplied with the AV receiver.

* Depending on the model used, not all operations may be available.

↳ To be continued

■ How to connect and setup

1 Confirm the connecting and setting.

1. Connect the **HDMI OUT** jack to the HDMI input jack of the TV.

2. Connect the audio output from the TV to the **OPTICAL IN 2** jack of the AV receiver using an optical digital cable.

Note

- When the audio return channel (ARC) function is used with an ARC capable TV, this connection is not necessary (→ [page 42](#)).
3. Connect the HDMI output of the Blu-ray Disc/DVD player/recorder to the **HDMI IN 1** jack of the AV receiver.

Note

- It is necessary to assign the HDMI input when connecting the Blu-ray Disc/DVD player/recorder to other jacks (→ [page 34](#)). Do not assign the components connected to the HDMI IN to the TV/CD input at this time. Appropriate CEC (Consumer Electronics Control) operation can not be guaranteed.

2 Change each item in the “HDMI Setup” menu according to the following settings:

- **HDMI Ctrl (RIHD): On**
- **Audio Return Ch (ARC): Auto**

See details of each setting (→ [pages 41, 42](#)).

3 Confirm the settings.

1. Turn on the power for all connected components.
2. Turn off the power of the TV, and confirm that the power of the connected components is turned off automatically with the link operation.
3. Turn on the power of the Blu-ray Disc/DVD player/recorder.
4. Start playback on the Blu-ray Disc/DVD player/recorder, and verify the following.
 - The AV receiver automatically turns on, and selects the input to which the Blu-ray Disc/DVD player/recorder is connected.
 - The TV automatically turns on, and selects the input to which the AV receiver is connected.
5. Following the operating instructions of the TV, select “Use the TV speakers” from the menu screen of the TV, and confirm that the audio is output from the speakers of the TV, and not from the speakers connected to the AV receiver.
6. Select “Use the speakers connected from the AV receiver” from the menu screen of the TV, and confirm that the audio is output from the speakers connected to the AV receiver, and not from the TV speakers.

Note

- Perform the above operations when you use the AV receiver for the first time, when the settings of each component are changed, when the main power of each component is turned off, when the power cable is disconnected from the power supply, or when there has been a power outage.

4 Operate with the remote controller.

For buttons that can be operated (→ [page 47](#)).

Note

- Audio from DVD-Audio or Super Audio CD may not output from the TV speakers. You will be able to output the audio from the TV speakers by setting the audio output of the DVD player to 2ch PCM. (It may not be possible depending on the player models.)
- Even if you set to output audio on the TV speakers, audio will be output from the speakers connected to the AV receiver when you adjust the volume or switch the input on the AV receiver. To output audio from the TV speakers, redo the operations on the TV.
- In case of an **RIHD** connection with **RI** and **RI** audio control compatible components, do not connect the **RI** cable at the same time.
- On the TV, when you select anything other than the HDMI jack to which the AV receiver is connected, the input on the AV receiver will be switched to “**TV/CD**”.
- The AV receiver will automatically power on in conjunction when it determines it to be necessary. Even if the AV receiver is connected to an **RIHD** compatible TV or player/recorder, it will not power on if it is not necessary. It may not power on in conjunction when the TV is set to output audio from the TV.
- Linked functions with the AV receiver may not work depending on the component model connected. In such cases, operate the AV receiver directly.

About HDMI

Designed to meet the increased demands of digital TV, HDMI (High Definition Multimedia Interface) is a new digital interface standard for connecting TVs, projectors, Blu-ray Disc/DVD players, set-top boxes, and other video components. Until now, several separate video and audio cables have been required to connect AV components.

With HDMI, a single cable can carry control signals, digital video, and up to eight channels of digital audio (2-channel PCM, multichannel digital audio, and multichannel PCM).

The HDMI video stream (i.e., video signal) is compatible with DVI (Digital Visual Interface)*¹, so TVs and displays with a DVI input can be connected by using an HDMI-to-DVI adapter cable. (This may not work with some TVs and displays, resulting in no picture.)

The AV receiver uses HDCP (High-bandwidth Digital Content Protection)*², so only HDCP-compatible components can display the picture.

The AV receiver's HDMI interface is based on the following:

Audio Return Channel, 3D, x.v.Color, DeepColor, Lip Sync, DTS-HD Master Audio, DTS-HD High Resolution Audio, Dolby TrueHD, Dolby Digital Plus, DSD and Multichannel PCM.

Supported Audio Formats

- 2-channel linear PCM (32–192 kHz, 16/20/24 bit)
- Multichannel linear PCM (up to 7.1 ch, 32–192 kHz, 16/20/24 bit)
- Bitstream (DSD, Dolby Digital, Dolby Digital Plus, Dolby TrueHD, DTS, DTS-HD High Resolution Audio, DTS-HD Master Audio)

Your Blu-ray Disc/DVD player must also support HDMI output of the above audio formats.

About Copyright Protection

The AV receiver supports HDCP (High-bandwidth Digital Content Protection)*², a copy-protection system for digital video signals. Other devices connected to the AV receiver via HDMI must also support HDCP.

*¹ DVI (Digital Visual Interface): The digital display interface standard set by the DDWG*³ in 1999.

*² HDCP (High-bandwidth Digital Content Protection): The video encryption technology developed by Intel for HDMI/DVI. It's designed to protect video content and requires a HDCP-compatible device to display the encrypted video.

*³ DDWG (Digital Display Working Group): Lead by Intel, Compaq, Fujitsu, Hewlett Packard, IBM, NEC, and Silicon Image, this open industry group's objective is to address the industry's requirements for a digital connectivity specification for high-performance PCs and digital displays.

Note

- The HDMI video stream is compatible with DVI (Digital Visual Interface), so TVs and displays with a DVI input can be connected by using an HDMI-to-DVI adapter cable. (Note that DVI connections only carry video, so you'll need to make a separate connection for audio.) However, reliable operation with such an adapter is not guaranteed. In addition, video signals from a PC are not supported.
- The HDMI audio signal (sampling rate, bit length, etc.) may be restricted by the connected source component. If the picture is poor or there's no sound from a component connected via HDMI, check its setup. Refer to the connected component's instruction manual for details.

Supplied Accessories

Make sure you have the following accessories.

Front speaker (SKF-558)

Front speakers

Speaker cables 3.0 m
(White) (Red)

20 thin rubber stoppers*1
(For Front/Center/
Surround speakers)

8 thick rubber stoppers*1
(For Front/
Surround speakers)

*1 Configuration of the rubber stoppers may be different from the figure, such as being 2 sheets instead of 1 sheet, but the total number will be same.

Center speaker (SKC-391)

Center speaker

Speaker cable 3.0 m
(Green)

Surround speaker (SKR-558)

Surround speakers

Speaker cables 8.0 m
(Blue) (Gray)

Subwoofer (SKW-358)

Subwoofer

Speaker cable 3.0 m
(Purple)

4 floor pads

Part Names

SKF-558/SKR-558

SKC-391

Caution

- The front grilles are not designed to be removed so do not attempt to remove them forcibly, as this will damage them.

SKW-358

Before Using the Home Cinema Package

Using the Rubber Stoppers for a More Stable Platform

We recommend using the supplied rubber stoppers to achieve the best possible sound from your speakers. The rubber stoppers prevent the speakers from moving, providing a more stable platform.

Using the Floor Pads for Subwoofer

If the subwoofer is placed on a hard floor (wood, vinyl, tile, etc.) and playback is very loud, the subwoofer's feet may damage the flooring. To prevent this, place the supplied pads underneath the subwoofer's feet. The pads also provide a stable base for the subwoofer.

Wall Mounting

To mount the front/surround speakers vertically, use the keyhole slot shown to hang each speaker on a screw that's securely screwed into the wall.

To mount the center speaker horizontally, use the two keyhole slots shown to hang the speaker on two screws that are securely screwed into the wall.

Keyhole slots for wall mounting

Tip

- If the center speaker is tilted, loosen the screw on the declined side to move upward so that the speaker could be adjusted vertically.

Caution

- A mounting screw's ability to support a speaker depends on how well it's anchored to the wall. If you have hollow walls, screw each mounting screw into a stud. If there are no studs, or the walls are solid, use suitable wall anchors. Use screws with a head diameter of 9 mm or less and a shank diameter of 4 mm or less. With hollow walls, use a cable/pipe detector to check for any power cables or water pipes before making any holes.
- Leave a gap of between 5 mm and 10 mm between the wall and the base of the screw head, as shown (We recommend that you consult a home installation professional).

Enjoying Home Cinema

The Home Cinema means that you can enjoy surround sound with a real sense of movement in your own home — just like being in a movie theater or concert hall.

① Front left and right speakers (SKF-558)

They should be positioned facing the listener at about ear level, and equally spaced from the TV. Angle them inward slightly so as to create a triangle, with the listener at the apex.

② Center speaker (SKC-391)

Position it close to your TV (preferably on top) facing forward at about ear level, or at the same height as the front left and right speakers.

③ Surround left and right speakers (SKR-558)

Position them at the sides of the listener, or slightly behind, about 60 to 100 cm above ear level. Ideally they should be equally spaced from the listener.

④ Subwoofer (SKW-358)

The subwoofer handles the bass sounds of the LFE (Low-Frequency Effects) channel and bass from the satellite speakers when a crossover is specified. The volume and quality of the bass output from your subwoofer will depend on its position, the shape of your listening room, and your listening position. In general, a good bass sound can be obtained by installing the subwoofer in a front corner, or at one-third the way along the front wall, as shown.

Connecting the Speakers

Speaker Connection Precautions

Read the following before connecting your speakers:

- Turn off your receiver before making any connections.
- Pay close attention to speaker wiring polarity. Connect positive (+) terminals to only positive (+) terminals, and negative (-) terminals to only negative (-) terminals. If the speakers are wired incorrectly, the sound will be out of phase and will sound unnatural.
- Be careful not to short the positive and negative wires. Doing so may damage your amp.

Specifications

■ Passive Subwoofer (SKW-358)

Type	Bass-reflex type Passive subwoofer
Impedance	6 Ω
Maximum input power	130 W
Sensitivity	82 dB/W/m
Frequency response	30 Hz to 150 Hz
Cabinet capacity	24 L
Dimensions (W × H × D)	211 mm × 425 mm × 381 mm (incl. projection)
Weight	5.5 kg
Drivers unit	16 cm Cone × 1
Terminal	Spring type color coded
Other	Non-magnetic shielding

■ Front Speakers (SKF-558)

Type	Full Range Bass-reflex
Impedance	6 Ω
Maximum input power	120 W
Sensitivity	81 dB/W/m
Frequency response	80 Hz to 20 kHz
Cabinet capacity	1.1 L
Dimensions (W × H × D)	101 mm × 175 mm × 116 mm (incl. grille and projection)
Weight	0.7 kg
Drivers unit	8 cm Cone × 1
Terminal	Spring type color coded
Keyhole slot	Available
Grille	Fixed
Other	Magnetic shielding

■ Center Speaker (SKC-391)

Type	Full Range Bass-reflex
Impedance	6 Ω
Maximum input power	120 W
Sensitivity	80 dB/W/m
Frequency response	80 Hz to 20 kHz
Cabinet capacity	1.8 L
Dimensions (W × H × D)	240 mm × 102 mm × 121 mm (incl. grille and projection)
Weight	0.8 kg
Drivers unit	8 cm Cone × 1
Terminal	Spring type color coded
Keyhole slot	Available
Grille	Fixed
Other	Non-magnetic shielding

■ Surround Speakers (SKR-558)

Type	Full Range Bass-reflex
Impedance	6 Ω
Maximum input power	120 W
Sensitivity	81 dB/W/m
Frequency response	80 Hz to 20 kHz
Cabinet capacity	1.1 L
Dimensions (W × H × D)	101 mm × 175 mm × 116 mm (incl. grille and projection)
Weight	0.7 kg
Drivers unit	8 cm Cone × 1
Terminal	Spring type color coded
Keyhole slot	Available
Grille	Fixed
Other	Non-magnetic shielding

Specifications and appearance are subject to change without prior notice.

Note

For non-magnetic shielded speakers:

Try moving the speakers away from your TV or monitor. If discoloration should occur, turn off your TV or monitor, wait 15 to 30 minutes, and then turn it back on again. This normally activates the degaussing function, which neutralizes the magnetic field, thereby removing any discoloration effects.

Lieferumfang

Überprüfen Sie, ob Sie folgende Zubehörteile bekommen haben.

Front-Lautsprecher (SKF-558)

Front-Lautsprecher

Lautsprecherkabel 3,0 m
(Weiß) (Rot)

20 dünne Gummistopper*1
(Für Front/Center/
Surround-Lautsprecher)

8 dicke Gummistopper*1
(Für Front/
Surround-Lautsprecher)

*1 Es kann sein, dass die Konfiguration der Gummistopper anders ist als die auf der Abbildung. Es können zum Beispiel 2 Lagen sein anstatt nur 1, aber die Anzahl wird die gleiche sein.

Center-Lautsprecher (SKC-391)

Center-Lautsprecher

Lautsprecherkabel 3,0 m
(Grün)

Surround-Lautsprecher (SKR-558)

Surround-Lautsprecher

Lautsprecherkabel 8,0 m
(Blau) (Grau)

Subwoofer (SKW-358)

Subwoofer

Lautsprecherkabel 3,0 m
(Lila)

4 Bodenauflagen

Teilenamen

SKF-558/SKR-558

SKC-391

Achtung

- Die vorderen Abdeckungen können nicht entfernt werden. Versuchen Sie daher nicht, sie gewaltsam zu entfernen. Sie könnten beschädigt werden.

SKW-358

Bevor Sie das Heimkinopaket verwenden

Verwendung der Gummistopper für eine stabilere Plattform

Wir empfehlen Ihnen die mitgelieferten Gummistopper zu verwenden, um den bestmöglichen Klang mit Ihren Boxen zu erzielen. Die Gummistopper verhindern, dass die Boxen sich bewegen und bieten eine stabilere Plattform.

Verwendung der Bodenauflagen für den Subwoofer

Wenn der Subwoofer auf einem harten Boden (Holz, Vinyl, Fliesen, usw.) aufgestellt wird und die Wiedergabe sehr laut ist, können die Füße des Subwoofers den Boden beschädigen. Um dies zu vermeiden, legen Sie die mitgelieferten Bodenauflagen unter die Füße des Subwoofers. Die Bodenauflagen bieten auch ein stabiles Fundament für den Subwoofer.

Wandmontage

Um die Front- oder Surround-Lautsprecher vertikal zu montieren, verwenden Sie das Befestigungsloch, um jede Box an einer Schraube aufzuhängen, die sicher in die Wand geschraubt wurde.

Um den Center-Lautsprecher horizontal zu montieren, verwenden Sie die beiden Befestigungslöcher, um den Lautsprecher an zwei Schrauben aufzuhängen, die sicher in die Wand geschraubt wurden.

Befestigungslöcher für Wandmontage

Tip

- Wenn der mittlere Lautsprecher benannt wurde, lösen Sie die Schraube auf der schrägen Seite, um ihn nach oben zu verschieben, sodass er vertikal eingestellt werden kann.

Achtung

- Die Tragfähigkeit einer Befestigungsschraube hängt davon ab, wie gut sie in der Wand verankert ist. Wenn Sie Hohlwände haben, schrauben Sie jede Befestigungsschraube in einen Dübel. Wenn es keine Dübel gibt oder die Wände stabil sind, verwenden Sie geeignete Wandanker. Verwenden Sie Schrauben mit einem Kopfdurchmesser von 9 mm und einem Schaftdurchmesser von max. 4 mm. Bei Hohlwänden verwenden Sie einen Kabel-/Rohrleitungsdetektor, um die Wand nach Stromkabeln oder Wasserleitungen abzusuchen, bevor Sie Löcher bohren.
- Lassen Sie gemäß der Abbildung einen Abstand von 5 mm und 10 mm zwischen der Wand und der Unterseite des Schraubenkopfes (Wir empfehlen Ihnen, einen Fachmann für die Installation bei Ihnen zu Hause zu konsultieren).

Die Freuden des Heimkinos

Mit dem Heimkino können Sie Surround-Klang mit einer echten Bewegungswahrnehmung bei Ihnen zu Hause genießen – als ob Sie sich in einem Kino oder Konzertsaal befinden.

① Linke und rechte Front-Lautsprecher (SKF-558)

Sie sollten auf die Hörer ausgerichtet sein, und zwar auf Ohrhöhe, und im gleich großen Abstand zum Fernseher positioniert werden. Drehen Sie sie leicht nach innen, um ein Dreieck zu erzielen, an dessen Unterseite sich der Hörer befindet.

② Center-Lautsprecher (SKC-391)

Stellen Sie sie so nahe wie möglich an den Fernseher (vorzugsweise darauf) und richten Sie sie auf Hörposition oder auf derselben Höhe befinden wie den linken und rechten Front-Lautsprecher aus.

③ Linke und rechte Surround-Lautsprecher (SKR-558)

Stellen Sie sie seitlich der Zuhörer oder etwa 60 bis 100 cm über Ohrhöhe leicht hinter der Hörposition auf. Idealerweise sollten Sie im gleichen Abstand vom Zuhörer entfernt positioniert werden.

④ Subwoofer (SKW-358)

Der Subwoofer kümmert sich um den Bassklang des LFE (Low-Frequency Effekts/Effekte bei niedriger Frequenz) Kanals und den Bass von den Satellitenlautsprechern, wenn ein Crossover festgestellt wird. Der Pegel und die Intensität der Basswiedergabe Ihres Subwoofers sollte sich nach der Hörposition, der Form des Hörraums und seinem Aufstellungsort richten. Im Allgemeinen kann ein guter Bassklang erzielt werden, wenn man den Subwoofer in einer vorderen Ecke bzw. bei einem Drittel der Länge der vorderen Wand gemäß der Abbildung aufstellt.

Anschließen der Lautsprecher

Vorsicht beim Anschließen der Lautsprecher

Bevor Sie Ihre Lautsprecher anschließen, lesen Sie sich folgende Hinweise durch:

- Schalten Sie Ihren Receiver aus, bevor Sie Ihre Lautsprecher anschließen.
- Achten Sie besonders auf die Polarität der Lautsprecherkabel. Verbinden Sie den Pluspol (+) eines Anschlusses mit dem Pluspol (+) der Anschlüsse und den Minuspol (-) eines Anschlusses mit dem Minuspol (-) der Anschlüsse. Wenn Sie die Polarität vertauschen, tritt eine Phasendrehung auf, welche die Klangqualität beeinträchtigt.
- Vermeiden Sie außerdem Kurzschlüsse des Plus- und Minuspols. Andernfalls könnte Ihr Verstärker beschädigt werden.

Technische Daten

■ Passiver Subwoofer (SKW-358)

Sparte	Bass-Reflex-Typ passiver Subwoofer
Impedanz	6 Ω
Maximale Eingangsleistung	130 W
Empfindlichkeit	82 dB/W/m
Frequenzverhalten	30 Hz bis 150 Hz
Gehäuse-Fassungsvermögen	24 L
Abmessungen (B × H × T)	211 mm × 425 mm × 381 mm (inkl. Projektion)
Gewicht	5,5 kg
Steuereinheit	16 cm Kegel × 1
Anschluss	Federzug farbkodiert
Sonstiges	Nicht magnetische Abschirmung

■ Front-Lautsprecher (SKF-558)

Sparte	Fullrange-Bassreflex
Impedanz	6 Ω
Maximale Eingangsleistung	120 W
Empfindlichkeit	81 dB/W/m
Frequenzverhalten	80 Hz bis 20 kHz
Gehäuse-Fassungsvermögen	1,1 L
Abmessungen (B × H × T)	101 mm × 175 mm × 116 mm (inkl. Abdeckung und Überstand)
Gewicht	0,7 kg
Steuereinheit	8 cm Kegel × 1
Anschluss	Federzug farbkodiert
Befestigungsloch	Verfügbar
Abdeckung	Fixiert
Sonstiges	Magnetische Abschirmung

■ Center-Lautsprecher (SKC-391)

Sparte	Fullrange-Bassreflex
Impedanz	6 Ω
Maximale Eingangsleistung	120 W
Empfindlichkeit	80 dB/W/m
Frequenzverhalten	80 Hz bis 20 kHz
Gehäuse-Fassungsvermögen	1,8 L
Abmessungen (B × H × T)	240 mm × 102 mm × 121 mm (inkl. Abdeckung und Überstand)
Gewicht	0,8 kg
Steuereinheit	8 cm Kegel × 1
Anschluss	Federzug farbkodiert
Befestigungsloch	Verfügbar
Abdeckung	Fixiert
Sonstiges	Nicht magnetische Abschirmung

■ Surround-Lautsprecher (SKR-558)

Sparte	Fullrange-Bassreflex
Impedanz	6 Ω
Maximale Eingangsleistung	120 W
Empfindlichkeit	81 dB/W/m
Frequenzverhalten	80 Hz bis 20 kHz
Gehäuse-Fassungsvermögen	1,1 L
Abmessungen (B × H × T)	101 mm × 175 mm × 116 mm (inkl. Abdeckung und Überstand)
Gewicht	0,7 kg
Steuereinheit	8 cm Kegel × 1
Anschluss	Federzug farbkodiert
Befestigungsloch	Verfügbar
Abdeckung	Fixiert
Sonstiges	Nicht magnetische Abschirmung

Technische Daten und Aussehen können ohne vorherige Ankündigung geändert werden.

Anmerkung

Falls die Lautsprecher nicht magnetisch abgeschirmt sind:

Versuchen Sie die Lautsprecher weiter entfernt von Ihrem Fernsehgerät oder Monitor aufzustellen. Sollte eine Verfärbung auftreten, schalten Sie das Fernsehgerät oder den Monitor aus, warten Sie 15 bis 30 Minuten und schalten Sie das Gerät dann wieder ein. Normalerweise wird hierdurch die Entmagnetisierungsfunktion aktiviert, die das magnetische Feld neutralisiert, wodurch alle Farbveränderungen verschwinden.
