Highlights

Warm white light (2700K)

Light can have different color temperatures, indicated in units called Kelvin (K). Bulbs with a low Kelvin value produce a warm, more cozy light, while those with a higher Kelvin value produce a cool, more energizing light.

36° halogen light beam

With a familiar focused light output, equal in look and feel to Halogen reflectors, this LED reflector light bulb is suitable for both accent lighting and general purpose lighting.

Lifetime 15

Providing the same incandescent look and feel, while offering the much longer lifetime.
