- Unwind with warm white light
- Stay focussed

Place it anywhere

- Designed to fit perfectly as a standard GU-10 spot

Easy, reliable and future proof system

- Connect up to 50 Philips Hue lights

PHILIPS

Kenmerken

Create your ambience

Set the right ambience for any moment with a range of beautiful, natural white light. Use the app to set any shade of white light, from cool energizing daylight to relaxing warm white light. Take control and set the ambience. Not too bright. Not too dark. Just right.

Wake-up naturally

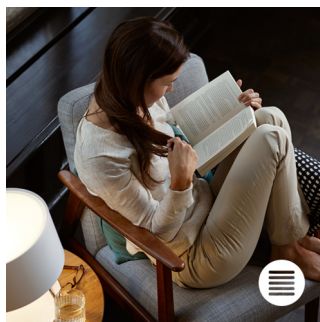

Ease your sleeping routine and wake up gently for a fresh start of each day. Philips Hue will help get you out of bed in a nice way. The gradually increasing light intensity gives you the feeling you are waking up naturally with sunlight - rather than the rude awakening of an alarm ringing.

Boost your energy levels

Skip your morning coffee and get ready for the day with cool, bright white daylight that helps to energize your body and mind. Perfect for those moments when you need a kickstart or when your batteries are running low.

Reading

Lose yourself in your favorite novels for hours on end with Philips Hue. It gives you the right white light for a perfect read.

Relax and sleep better

Put your feet up and relax with a soft glow of white light for the perfect end of the day. Relaxing white light will help you to unwind in the evening and sleep better at night.

Concentrate

Stay focussed with finely tuned bright white light. The best way to get things done quickly and efficiently without distractions, no matter if you're studying for an exam, working from home, or picking an outfit to look your best.

Expand your ecosystem

You can connect up to 50 lights to the Philips Hue bridge. Simply begin with any of the available starter kits or a single bridge and start adding Philips Hue products. You can then control your lights at the swipe of a finger with the intuitive Philips Hue app for iOS and Android smart devices. Philips Hue is based on ZigBee, a low power and reliable technology to control your lights. New features and improvements are continuously added to the system. Updates to both software and firmware are done wirelessly and seamlessly directly to your Philips Hue product.

Perfect fit design (HUE WA)

The Philips Hue white ambiance GU-10 lamp is designed as a perfect retrofit solution, so it blends in seamlessly with your existing spot lighting fixtures. This makes it a smart and energy-efficient alternative to traditional halogen spots.
